(Trial resumed)

THE COURT: You may be seated.

Good morning, everyone. I think we have all but one of the jurors that we were expecting, so we're in relatively good shape on that.

Before we start, anything to discuss? Any update on the 6(c) situation?

MR. DENTON: Yes, your Honor.

We have a proposed stipulation with respect to the two, I think, outstanding item, the portion of the Michael memorandum and the portions of the one document -- I guess it's two documents relating to Count Three that we discussed yesterday. We've just given a copy of that to the defendant. We're happy to hand up a copy to the Court as well. So we're optimistic that we'll be able to resolve it that way.

THE COURT: OK. Your suggestions for how we handle it; if it will require a classified hearing to discuss any of the particulars? If so, I guess one option would be to do that in the break between finishing jury selection and the openings, so that everybody's on the same page for openings.

MR. DENTON: That's certainly an option, your Honor. We literally just had a chance to give it to the defendant, so he certainly needs a chance to take a look at it. I think we're happy to proceed however the Court would like on that score.

MR. DENTON: I think the only other thing we'll note, your Honor, is -- and Mr. Lockard can address this in more detail if necessary, because he's going to be putting on Special Agent Evanchec. Among the exhibits that the defendant has provided us are large compendiums of the 3500 for Special Agent Evanchec and some of the other witnesses. Obviously, there are sort of particular rules and circumstances under which a witness's prior statements are admissible.

THE COURT: Tell you what. Let's hold that until after jury selection.

MR. DENTON: That's fine, your Honor.

THE COURT: Mr. Schulte, I'm assuming you haven't had an opportunity to look at the proposed stipulations, but I would love, before we break, to have a sense of whether we need to have a classified hearing or not, whether there's any issues for me to discuss, because that'll have some bearing on how long the break is between when we finish jury selection and when we can begin openings. So if you're not in a position to tell me now, before we break, I would like a better sense if you're able to do that.

(Defendant conferred with standby counsel).

MR. SCHULTE: I'm sorry. Are you talking about the stipulations?

THE COURT: Yes.

MR. SCHULTE: Yeah. I don't think there's going to be -- it's on the record, right? That I don't agree or I don't -- I object to them coming in, but the Court has said you've made your ruling, and it's on the record that I'll sign it, doesn't mean I consent. Right?

THE COURT: We're talking about different stipulations. I'm referring to the two new ones that Mr. Denton just referred to, both of which pertain to classified information, one that we discussed yesterday in the classified hearing, and the other that pertains to the Michael memorandum.

MR. SCHULTE: OK. They just handed them to me. I haven't read them at all.

THE COURT: Right. I understand that.

MR. SCHULTE: Oh, OK.

THE COURT: Before we break with the jury, I think I just need to get a better sense of whether we need to have a classified hearing or not so I know how long the break needs to be and what we're going to do during the break.

MR. SCHULTE: OK.

THE COURT: If you have a chance to look at them and we can discuss that before the break, that would be ideal. If it means giving you a couple more minutes beyond what you need for your peremptory challenges, then I'm prepared to do that.

Anything else that you need to raise?

MR. SCHULTE: Yes. I just had, on the same token, once we finish here and we go down to the courtroom, I'd just ask for 20-, 30-minute adjournment for us to figure out the computer situation with the exhibits and stuff, since I haven't had a chance to be able to go through all that yet.

THE COURT: All right. Well, I don't know if I can give you 20 or 30 minutes, but let's see where we get to. If we get to the point where the jury -- I didn't tell the jury to bring any lunch, so I do need to give them a longer lunch period today than I would normally give them during trial. At the same time, I have to end at 3:00 today. I have a hard stop and just can't go past three. Certainly a lot of things.

We'll see where things stand, and I'll try to give you as much time as I reasonably can, but we also need to resolve these remaining issues. I will try to do that. Remind me, and I will certainly try.

Anything else?

MR. SCHULTE: No. That's it.

THE COURT: All right. Great. When Mr. Lee gets back, we'll see if that last juror is here, and then we can pick up where we left off.

(Continued on next page)

25

1 THE COURT: You may be seated. Anything for us to discuss before I bring 2 All right. 3 the jury up for preliminary instructions? Mr. Denton, anything from you? 4 5 MR. DENTON: Your intention was to take up other 6 issues after letting them go for lunch, right, your Honor? 7 THE COURT: I think so, but I would like to have a sense of what the nature and scope of those issues are so that 8 9 I have a sense of how much time to tell them. 10 MR. DENTON: That's fine with us, your Honor. 11 THE COURT: Well, what are the issues? That's my 12 point. I need to know. 13 MR. DENTON: I think that's really a question for 14 Mr. Schulte. 15 THE COURT: OK. But you don't have any independent issues to raise in that break. 16 17 MR. LOCKARD: It may depend, your Honor, as to how our 18 discussions with Mr. Schulte about the stipulations that we'll need before the first witness takes the stand, but -- so maybe 19 20 yes, maybe no. 21 THE COURT: OK. One question. Somebody at some point 22 said something about reserved seats for the parties in the 23 courtroom and/or the CIA, etc. Is there any need for that? 24 I would anticipate that the courtroom is not going to

be filled to capacity except, perhaps, during jury addresses.

MR. LOCKARD: I don't think we're aware of that issue, your Honor.

THE COURT: OK. Just so you guys know, we do have an overflow courtroom. I think it's 20B. Is that correct?

20B is the overflow courtroom if you want to let folks know.

Mr. Schulte, issues to discuss on your end? I guess what do you have to say about the stipulations that the government gave you this morning?

MR. SCHULTE: Yeah. So, I'm going through them now, and the ones from the last trial, I signed those. And I'm going through and working with counsel, standby counsel. We've signed a number of them and have some recommended changes for some of them. As soon as we're finished going through all of it, we'll give it to the government and then we'll see what the government wants to do.

of is which of these, if any, I need resolved before openings. I had thought the stipulation that would address the classified evidence that Mr. Schulte had noticed with respect to making the public disclosure argument, I imagine that's something that both sides would want to know before we open, what form, if any, that evidence is coming in. Am I wrong about that?

 $\mbox{MR. DENTON:}\ \mbox{No, your Honor.}\ \mbox{We'd like that resolved.}$

THE COURT: OK. And what about the Michael

25

document.

memorandum; can that wait? 1 2 MR. DENTON: Probably, your Honor, yes. 3 THE COURT: OK. 4 Mr. Schulte, from your perspective, I guess, No. 1, I 5 don't know if you have had a chance to read through the 6 stipulation concerning the public disclosure evidence, but if 7 you haven't, why don't you take a minute and do that so that we can then discuss whether and what kind of discussion we need to 8 9 have. Or if it's just a wordsmithing issue that you can sort 10 out with the government, I'm happy to leave that for later. 11 MR. SCHULTE: OK. Yeah, I'll take a look now. 12 THE COURT: OK. And from your perspective, are there 13 any other matters that we need to resolve before openings? 14 MR. SCHULTE: Yes, just the -- working on the technical thing, to figure out how exactly we'll, I'll be able 15 to do the exhibits and stuff. But besides that, nothing else. 16 17 THE COURT: OK. My hope is to give you some time to do that during our break, but again, I need a sense of whether 18 19 we're going to need to have a proceeding, and if so, whether it 20 needs to be in a closed session. So if you could take a look at that one stipulation now and then let me know when you're 21 22 ready to discuss it, that would be helpful. 23 MR. SCHULTE: OK. 24 All right. I think we've had time to review the

THE COURT: OK.

MR. SCHULTE: The stipulation.

THE COURT: And?

MR. SCHULTE: And, you know, I take the position that this stipulation, it doesn't allow me substantially the same ability to make the same defense. It's not an adequate substitution. Because it sanitizes the information, it prevents me from presenting the actual documents to the jury. There's multiple documents. The page numbers, even if other information is redacted in those, being able to present all —you know, multiple documents that have this content along with, you know, multiple other statements.

And then I wanted to quote that the Second Circuit said, in *United States v. Wilson*, 750 F.2d 79, 1984, "normal evidentiary principles govern the admissibility of classified evidence." So I think that, you know, given this, to the degree that the government wants to do a wholesale redaction to the original document, I think that's better, and I'm able to present, you know, my case better and — to the jury in that way.

THE COURT: OK. I could be wrong, but -- I take no issue with the principle that you quoted from Wilson, but I think that's at the 6(a) stage of the CIPA process. I've made the determination that the evidence that you're seeking to offer is relevant and admissible, and now we're in 6(c) land,

where the government can propose a stipulation or redaction and if I find that it does substantially allow you to make the defense that — you know the relevant language — then I think I'm required to accept it. So the fact that you would prefer to use the evidence in a different form, that alone doesn't cut it. And I don't think redaction here — I'll hear from Mr. Denton, but I think the concern and problem with redaction is if a document is redacted, that a member of the public could compare the redacted document with the one that's admitted at trial and very easily then — No. 1, it would confirm that that's an official document, which the government has not to date done, and is itself a problem; and No. 2, the public would very easily see the portions that are redacted from what would then be confirmed to be an official document. I think that's the source of the problem with respect to doing a redaction.

Mr. Denton.

(Continued on next page)

MR. DENTON: That, and your Honor, the fact that there is large quantities of information that are irrelevant, we would end up with large documents with page, after page, after page, redacted only to get to a small snippet, I think from an evidentiary perspective we thought this was more efficient as well.

THE COURT: So to the extent that you can address it in this setting, Mr. Schulte, is there another argument as to why this would affect your ability to make the defense that you --

MR. SCHULTE: Yes. I mean, I think that's the point though, is that having the large document to present how much information that was disclosed and there is multiple documents, too, so it is not just one. So this page kind of makes it seem it is all from the same document but basically showing there is multiple documents from the release and showing the length of the document, 50 pages, 60 pages, even if a lot of it is redacted, I think that that's -- I want to be able to make that same defense with this stipulation.

And as to the Court's earlier point, I mean, the government is charging me with the disclosure of this in saying that it is from the CIA so I am sure they already recognize that it comes from the CIA so to the degree that everything else in there is redacted I don't think that says anything to the public because it's -- right -- it's the government is

saying all of this stuff is still classified anyway so if you redacted everything except for the stuff that is relevant here, I don't think that gives away anything. Right?

THE COURT: So I think that's a misconception.

My understanding is that, yes, you are being prosecuted for disclosure of national defense information and in that sense the government has obviously acknowledged that some portion of what appears at Vault 7 and Vault 8 is genuine national defense information and it needs to prove that to the satisfaction of the jury to convict you, but I think the government has relied on the fact that it has never acknowledged that all of Vault 7 and Vault 8 are actual, legitimate, non-altered CIA documents and in that sense requiring them to identify one as an official document, let alone singling it out, I think are the sources of harm that could flow here.

MR. SCHULTE: Well, I think there is — that brings up a very major issue because the government is introducing Government Exhibit 1 as a classified exhibit and they are taking all of this stuff from WikiLeaks and giving it to the jury and saying this is the classified information he released. So to the degree the government is trying to say that some of the documents are not legitimate CIA documents, that's a critical piece that the defense needs to know and they obviously can't present those documents to the jury. And then,

if some of those documents are not actually NDI or come from the CIA, I think I need to know that so that the defense can raise a proper defense about those documents.

THE COURT: I wouldn't think so. My understanding is it has never been disputed that some, if not the vast majority of Government Exhibit 12, qualifies as NDI. I understand the critical issue with respect to the WikiLeaks charges as whether you were in fact the person who stole it and leaked it. contrast, I think the MCC charges are a little bit more complicated because of the public disclosure issues and for that reason the government has now narrowed its theory of the case and is identifying the particular information that it alleges is NDI. So I think there it is certainly important for the jury to understand what they need to decide is NDI for the first charges. Obviously they do need to make a finding that some of Government Exhibit 1 constitutes NDI but, number one, I don't think that that requires going through the entirety of it and identifying what is and isn't; and number two, you will be able to make the argument if you want to make it that none of it is NDI -- but that doesn't strike me as a very winning argument and doesn't strike me as one that you have even disputed to date, but.

MR. SCHULTE: Yes. So I think, you know, the point is that the government is trying to say that not all the documents from the WikiLeaks disclosure are CIA documents but at the same

token they're providing those documents to the jury and saying this is NDI that was released by WikiLeaks and that these are CIA documents. There is a clear contradiction here. why this has never been argued before because, you are right, it was never -- it was never really a legitimate argument because -- but to the degree that the government is now saying that some of those documents are not legitimate CIA documents, they shouldn't be allowed to present those documents to the jury and say that this is NDI. Right? I mean, that's the problem now, is they've never said this before so this is the reason that they're saying that we can't introduce some of this stuff for the MCC counts. Then the problem comes back to the WikiLeaks count. They're saying some of this stuff is not NDI, it is not real CIA documents, the defense needs to know that and those documents can't be presented to the jury.

THE COURT: Mr. Denton?

MR. DENTON: Your Honor, we are way off course here. The stipulation that the government proposed quotes the exact language that the defendant identified as the material that he sought to use with one redaction consistent with the broader section 6(c) redactions applied to all of the documents in this case. I think again, beyond that, there is nothing here to discuss. This clearly provides them with the information that he asked for and that the Court determined was relevant. It is the exact language. There really is no argument here.

THE COURT: And I think we are a little bit off course which is to say that Mr. Schulte is now raising a different issue just with respect to Government Exhibit 1. I'm not necessarily going to revisit my ruling on that but do you want to just respond to that?

MR. DENTON: The material contained on Government Exhibit 1 is classified. The fact that the government has not publicly acknowledged that it is all CIA material or identified every particular page as CIA material is immaterial to that. The NDI that he is alleged to have stolen and transmitted is actually the original source material from the CIA which has always been acknowledged to be NDI. There is really no issue about sort of what in, with the WikiLeaks disclosures, is and is not. There are certainly parts of it that are not CIA documents. The defendant knows that. There are parts of it that include the WikiLeaks documents like WikiLeaks cover pages for these things.

So again, the parsing of those specific components is not really relevant here.

THE COURT: I agree, so I think there is no reason or need to revisit Government Exhibit 1. Obviously, the government bears the burden of proving beyond a reasonable doubt that the information at issue is NDI and to the extent that it fails to do so, then I will either grant a Rule 29 motion or the jury will return a verdict in defendant's favor

but I don't think that on the WikiLeaks charges there is a need to disentangle what is contained in Government Exhibit 1, or at least based on what I expect the evidence to be I don't think there will be such a need.

With respect to the issue that was raised, namely the stipulation, again, we are in 6(c) land, I have already made the determination that the evidence that Mr. Schulte wishes to use is relevant and admissible which is the language that he quoted from Wilson. I, at this stage, my task is to decide whether this stipulation provides the defendant with substantially the same ability to make his defense as would disclosure of the specific classified information and I do so find.

Fundamentally, the argument that Mr. Schulte wants to make is that this particular piece of information that he is alleged to have leaked is as part of the MCC counts was previously publicly disclosed as part of the WikiLeaks leak. This allows him to do that and it is a stipulation identifying the precise issues or language that he himself identified when I tasked him with doing so and it states that it is available, publicly, on the Vault 7 release.

So I think on the basis of this he can make precisely the argument that he has been seeking to make that I have said he can make. I don't think that there is any need for the original documents let alone the redacted documents, the length

of those documents, the number of those documents, those are not relevant issues, it is whether the information was publicly disclosed. That is the relevant and probative issue and this allows him to make that argument. He doesn't need to show a redacted document to the jury to make that argument and if, indeed, a redacted document was shown to the jury, I would instruct the jury that it should not speculate as to what has been redacted and consider the redacted materials in any way, shape, or form. So, by definition, the redacted materials would be irrelevant to the jury's consideration.

So all of that is to say that I will grant the government's motion under 6(c) and we will proceed with this stipulation and that resolves the public disclosure issues subject to my potentially revisiting one of those issues as discussed in the classified session yesterday.

Unless there is anything further to discuss, I will have the jury brought up in a moment and we can proceed with my preliminary instructions. I anticipate those would take 20 or 30 minutes. At that point my plan would be to take a break. I think it would make sense, if the marshals are OK, letting Mr. Schulte remain in the courtroom for 15 or 20 minutes to get familiar with the computer system and make sure it is working and then we can reconvene for opening statements after that break.

The marshals are nodding their heads so I trust that

that's OK.

Anything else to discuss? Otherwise, we will get the jury and a wait their arrival. All right? Let's do that.

While we are going to get them just one note. I was looking at who is on the jury and there are date conflicts. Two of them had mentioned that they had plans over the July 4th weekend; one who was planning to leave on the 30th and be out on the 1st -- 30th and the 1st; the other who was going to be out has travel plans from the 1st to the 5th. My inclination would be to ask them -- well, I think I am inclined to say maybe we should just not have court on July 1st, which is the day before the long weekend and that would, I am sure, make everybody happy including perhaps you, and also mitigate the conflicts with their travel plans and then ask them to conform their travel plans to that. I think that would hopefully address those two.

The only other one that we may need to deal with and I will ask her if she can accommodate us is the juror who has the dress fitting in Oregon and was supposed to be there from July 10th to 17th. She did indicate that she might be able to change that so I am going to start there and hope for the best.

Any questions, concerns, objections to proceeding in that manner?

MR. DENTON: No, your Honor. I think we have some hope that the July 10th would not be an issue but understand if

```

(Jury present)

THE COURT: You may be seated.

Actually, if I could ask jurors no. 13 through 16, could you slide over one seat? Both to make sure that everyone can see the witness stand and also, juror 13, that conveniently means there is an empty seat next to you so if you would like to put your legs up to stretch, you are welcome to do so.

Welcome back, ladies and gentlemen -- or welcome to the courtroom that we will be using for trial in this matter and we will be spending a fair bit of time here in the coming weeks. I am going to give you some you preliminary instructions in a moment and then we are going to take a break before we commence with what follows but I will explain more about that in a moment. But at this time, I would ask you to please rise and raise your right hand so that we can administer the oath to you.

(Whereupon, a jury of 12 jurors and 4 alternates was impaneled and sworn)

THE COURT: So this case is now officially on trial.

As I stated earlier, the trial is scheduled to last up to five weeks, give or take. Candidly, it is very hard to predict these things, that's my best estimate at the moment. I will give you updates on a regular basis when I can, but I assure you that I will do everything that I can — and I have plenty of powers at my disposal — to make sure that we make as

efficient and effective use of your time as we can.

A couple things to note on the schedule. A couple of you mentioned that you do have travel over the July 4th weekend. I think what I am going to do is the following: At the moment, what I will say is we are not going to sit on Friday, July 1st. I am guessing those of you who don't have travel won't begrudge that and will enjoy that day. If those of you who do have travel around that weekend can change your travel plans so that you don't have to miss or you wouldn't miss the 30th or the 5th -- I know that that changes your plans a little bit -- I would very much appreciate it. You do need to be here for every trial day. So, please, make your best efforts to conform your travel plans to that schedule. I am trying to accommodate you as much as I can without making the trial even longer so do your best, let my law clerk know, and we will take it from there.

I know one of you also had travel plans for later in July. You had mentioned that you might be able to change that. See if you can. Also, let my law clerk know and we will take it as it comes. Depending on how things are going it may be that we are done by then but, obviously, it is hard to know at this point so if you can push it back a few weeks, it would definitely be better.

We will start each morning at or as close to 9:00 a.m. as we can to help ensure that we can start on time. I am going

1

2

3

4

5

6

7

8

14

15

16

17

18

19

20

21

22

23

24

25

to ask you to be in the jury room. Do not come to this courtroom yourself, you should go to the jury room where you just came from, and please be there by 8:45 at the latest. As I said to you yesterday, I know some of are you traveling from far away, some of you have to rely on public transportation or have to navigate traffic, just please plan accordingly and maybe build in some extra time at least for the first few mornings as you figure out how much time it takes you to be here to make sure you are here at 8:45 at the latest. cannot start until all of you are here. all right? I know I said that yesterday and proceeded without a couple of people because we were able to do that for the questioning and they arrived not long thereafter, but we cannot start until all 16 of you are here. So out of respect for one another and because I will do my best to get you out of here as quickly as I can, I need you to do your part, too, and that means being here ready and on time each day ready to go. So please be back in the jury room each morning and each morning thereafter unless I tell you otherwise by 8:45.

As an enticement for you to be on time, I have arranged for some breakfast and coffee for you to be in the jury room. So hopefully that will be there tomorrow morning and welcome you to the court house. As I have told you before, as I have told you yesterday, the plan would be to take one lunch break, and only one lunch break during the day. My guess

is with getting to and from the room that you are using as your jury room would be somewhere between 30 and 40 minutes, obviously not time for you to get a quick bite to eat, stretch your leg, use the restroom. That is, you will feel a little bit of a forced march, I assure you, but that's because I am trying to make the most effective use of your time. So that's the plan and then we will end each day at roughly 2:45 or thereabouts, give or take a few minutes, including, I should note, today.

When we get to the parties' summations and my instructions on your deliberations, as I did mention yesterday, I am likely to ask -- or actually require you to be here for longer days but I promise you that I will give you advance warning of when that is likely to come so that you can plan accordingly.

Given how short the one break is that we take, you won't be able to go out of the court house or really even the jury room to get food or do anything for that matter so you should bring some sort of snack or a light lunch. Breakfast may actually be enough to get you through until the end of the day, but bottom line is bring some food to ensure that you can focus for the rest of the day.

Now that you have been sworn let me give you some instructions about your duties and responsibilities as jurors. At the end of the trial I will give you more detailed

instructions and those instructions will govern your deliberations in this case but, for now, let me tell you how the trial will proceed.

The first step in the trial which we will begin after my lunch break today will be opening statements. The government will make an opening statement. After that I expect the defendant, who I remind you is representing himself, will make an opening statement as well but he is not required to do so and that is because, as I will mention in a moment and you will hear me say on other occasions, the burden rests on the government to prove the defendant's guilt beyond a reasonable doubt. A defendant in a criminal trial in our system of justice has no burden to do anything whatsoever so that includes making an opening statement.

The opening statements are not evidence. They serve no purpose other than to give you an idea, in advance, of the evidence that each party expects you to hear from the witnesses who will testify and the exhibits that are entered into evidence. The statements permit each party to tell you a little bit about what the case is all about but the only evidence comes from the witnesses and exhibits.

After the opening statements, the government will present its evidence. The government's evidence will consist of the testimony of witnesses as well as documents and exhibits. The government will examine its witnesses and the

defendant may cross-examine those witnesses.

Following the government's case the defendant may present a case, if he wishes to do so. Again, because of the presumption of innocence and the fact that the burden rests at all times on the government, the defendant is not required to offer any proof. If the defendant does present a defense case, however, the defense witnesses will testify and the government will have an opportunity to cross-examine them.

After the presentation of evidence is complete, the parties will deliver their closing arguments to summarize and interpret the evidence and just as the parties' opening statements are not evidence, their closing arguments are not evidence either.

Following closing arguments, I will give you my instructions on the law and then you will retire to deliberate on your verdict which must be unanimous and must be based on the evidence presented at trial. Your deliberations will be secret, you will never have to explain your verdict to anyone.

Under the law, a defendant in a criminal case, as I have mentioned to you, is presumed innocent and cannot be found guilty of the crimes charged unless a jury, after having heard all of the evidence in the case, unanimously decides that the evidence proves the defendant guilty beyond a reasonable doubt. In a criminal case the burden of proof remains with the government — the prosecution. For the jury to return a

verdict of guilty as to the defendant, the government must prove that the defendant is guilty beyond a reasonable doubt. A person charged with a crime has absolutely no burden to prove that he or she is not guilty and if the defendant chooses not to present any proof, that decision cannot be held against him or her and may not enter into your deliberations at all. I will, however, instruct you fully on the burden of proof after all of the evidence has been received.

Let me say a brief word about the fact that

Mr. Schulte is representing himself. Under the Sixth Amendment
to the Constitution of the United States, a defendant in a
criminal case has an absolute right to represent himself if he
wishes to do so. Every criminal defendant does have the right
to counsel but if he chooses to waive that right, he is
entitled to represent himself. As I have told you, Mr. Schulte
has chosen to waive his right to counsel and to represent
himself for the duration of the trial. That means that he will
be the one making objections if he believes that the government
is offering evidence improperly, he will be the one questioning
the witnesses, and he will be the one making his opening
statement if he chooses to do so, and any closing argument to
you at the conclusion of the trial.

As I mentioned, there are lawyers working with Mr. Schulte in a capacity known as standby counsel to assist him if he needs assistance and to help ensure that things run

more smoothly, but the bottom line is that Mr. Schulte is the one conducting his defense and will control his defense. are not to speculate on the reasons for Mr. Schulte's making the decision to represent himself. As I said, under the Constitution, every criminal defendant has the right to make that decision and he has made that decision. You are not to speculate as to his reasons, nor are you to consider that decision in any way, shape, or form, in connection with your deliberations. In other words, you should evaluate the evidence as you otherwise would and decide whether the government has proved Mr. Schulte's quilt beyond a reasonable The burden of proof, as I have said, remains always on the government. The fact that Mr. Schulte is now representing himself should not factor into your assessment of the evidence and whether the government has met its burden.

Second, Mr. Schulte is representing himself which means that anything he says in that capacity is not evidence. Just as what the lawyers say, the questions they ask, the objections they make are not evidence, the same is true of Mr. Schulte. Any question that he asks, any objection that he makes, anything that he says in his opening statement or his closing, that is not evidence. If he chooses to testify when the time comes then his testimony would be evidence but nothing else that he says during the trial is evidence. And, of course, I remind you, again, that a criminal defendant has no

obligation to testify or to put on any case because the burden is on the government at all times.

Let me explain the jobs that you and I are to perform during the trial. I will decide which rules of law apply to this case. I will decide that by making legal rulings during the presentation of the evidence and also, as I told you, in giving you final instructions after the evidence and arguments are complete. In order to do my job I may have to interrupt the proceedings from time to time to confer with the parties about the rules of law that should apply here. Sometimes we may talk here at the side bar, just as you saw us do during jury selection, to assure that it is outside of your hearing. Sometimes those discussions may take more time and so, as a convenience to you, I may excuse you from the courtroom. promise that I will try to avoid such interruptions as much as possible to keep the case moving and get you out of here as quickly as I can but, please, be patient, and understand that these conferences and interruptions are necessary to ensure the fairness of the trial and often help make the trial move faster.

While I decide the law that applies to this case you, the members of the jury, are the triers of fact. You will weigh the evidence presented and decide whether the government has proved beyond a reasonable doubt that the defendant is guilty of each charge in the indictment. You must pay careful

attention to all of the evidence presented and you must base your decision only on the evidence in the case and my instructions about the law.

As I have said a few times and will say many more times before this case is over, your decisions in this case must be based solely on the evidence that you see and hear during the trial. So, what then is evidence? I will give you further instructions at the end of the case but for now let me tell you that evidence consists only of the testimony of witnesses, documents, and other things admitted into evidence or stipulations agreed to by the parties. A stipulation, as I will explain to you, is a fancy lawyer term for an agreement between the parties.

Some of you have probably heard the terms circumstantial evidence and direct evidence. Do not be concerned with these terms. You are to consider all the evidence given in this trial. Certain things, however, are not evidence and must not be considered by you. The following is a list of what is not evidence.

First, as I have said, arguments, statements, and questions by the lawyers or by the defendant, Mr. Schulte -- except if he decides to testify as a witness -- are not evidence, nor are statements that I make or questions that I may ask of a witness.

Second, objections to questions are not evidence. The

lawyers and the defendant have an obligation to make an objection when they believe evidence being offered is improper under the rules of evidence that govern in this case. You should not be influenced by the objection or by my rulings on an objection. If an objection is sustained, ignore the question and any answer that may have been given. If an objection is overruled, you should treat the answer as you do any other. If you are instructed that some item of evidence is received for a limited purpose only, you must follow that instruction.

Third, testimony that I have excluded or told you to disregard is not evidence and must not be considered.

And fourth, anything you may have seen or heard outside the courtroom is not evidence and must be disregarded. You are to decide this case solely on the evidence presented here in the courtroom.

There is no formula to evaluate testimony or exhibits. For now, suffice it to say that you bring with you into this courtroom all of the experience and background of your lives. Do not leave your common sense outside the courtroom. The same types of tests that you use in your everyday dealings are the tests that you should apply in deciding how much weight, if any, to give to the evidence in this case. The law does not require you to accept all of the evidence admitted at trial. In determining what evidence you accept, you must make your own

evaluation of the testimony from each of the witnesses and the exhibits that are received in evidence. It is essential, however, that you keep an open mind until you have heard all of the evidence in the case. A case can be presented only step by step, witness by witness, before all evidence is before you. As you know from experience, you can hear one person give his or her version of an event and think it sounds very impressive or even compelling, and yet, upon hearing another person's version of the same event, or even the same person cross-examined with respect to the event, things may seem very different. In other words, there may be another side to any witness' story. You should use your common sense and good judgment to evaluate each witness' testimony based on all of the circumstances. Again, I cannot emphasize too strongly that you must keep an open mind until the trial is over. You should not reach any conclusions until you have all the evidence before you.

Under your oath as jurors, you are not to be swayed by bias or sympathy. All of us, no matter how hard we try, tend to look at others and weigh what they have to say through the lens of our own experience and background. We each have a tendency to stereotype others and make assumptions about them. Often we see life and evaluate evidence through a clouded filter that tends to favor those like ourselves. You must do the best you can to put aside such stereotypes for all

litigants and witnesses are entitled to a level playing field in which we do the best we can to put aside our stereotypes and prejudices. You are to be guided solely by the evidence in this case and my instructions about the law.

Finally, let me caution you about certain rules and principles governing your conduct as jurors in this case, some of which I have already mentioned to you.

First, you must not talk to each other about this case or about anyone who has anything to do with it until the end of the case when you go to the jury room to begin your deliberations. The reason for this requirement, as I have mentioned, is that you must not reach any conclusion on the charges until all of the evidence is in. As I have said, keep an open mind until you start your deliberations at the end of the case.

Second, do not communicate with anyone else about this case or with anyone who has anything to do with it until the trial has ended and you have been excused as jurors. Anyone else includes members of your family, your employers, and your friends, and no communicating about the case means no communicating in any way, shape, or form — in person, by telephone, by text, by instant message, by Facebook, by

Twitter, by Google, SnapChat, Instagram, blogs — whatever at all. You may tell your family, your employer, your friends, as I have said, that you are a juror in a criminal case and

16

17

18

19

20

21

22

23

24

25

approximately how long I expect it to last but, please, do not tell them anything else about the case until you have been discharged by me. You may think that Tweeting something about the case or posting something about it on Facebook is harmless, or mentioning to a friend the kind of case you are on, you may think that is harmless, but I assure you that it isn't and if you do anything like that, it will be major inconvenience to everyone involved in the trial, including you, so do not do it.

Third, this case arises out of activities that have been covered by the media and the trial itself may be covered by the media and people may talk about it. I don't know if that will happen but it may happen. From this moment on you, as jurors, must not pay any attention to outside information or commentary about this case whether it is in the newspapers, on TV or radio, on the Internet, on your phones, anywhere. You must ignore even the comments and opinions of your family and friends if they happened to say anything about this case, nor may you discuss the case, or anyone or anything having to do with it with anyone else including, as I have said, your family members, your fellow jurors and so forth until I have discharged you as a juror in this case. This means that you must not speak to anyone about the case or anyone or anything having to do with it. You must not read or listen to anything about this case from any source. If you see something on the television that discusses this case, change the channel.

you hear something on the radio, change the channel. If you see something in the newspaper, turn the page. If you see something on the Internet, close the browser. Whatever it may be, it is your obligation to ensure that you are not exposed to any information about the case.

If you are exposed to something, I ask you to bring that immediately to the attention of my staff and only my staff. Don't discuss it with any fellow juror, don't discuss it with anyone except report it to my staff so that we can address it, as appropriate.

You must not allow anyone to speak to you about this case as well. If you are approached by anyone to speak about it, politely tell them that I have directed you not to do so. Do not remain in the presence of anyone who may be discussing the case.

If any person should attempt to communicate with you about this case at any time throughout the trial, either in or out of the court house, you must immediately report that to someone on my staff — either Mr. Lee, who is here with us for the next couple of days; his replacement will be my regular courtroom deputy, Ms. Smallman, will return in a few days; my law clerk; but to no one else but a member of my staff. And when I say report that to no one else, I mean you should not tell anyone including your fellow jurors.

To minimize the improper communications it is

important that you go straight to the jury room when you come in in the morning — that's the room that you just came from so take note of where that is so that you know where to go — that you remain in the jury room for the duration of the trial day unless I tell you otherwise, and that you head directly out of the court house at the end of the trial day. You should use the bathrooms in the jury room and on that floor and nowhere else.

You may not, as I have mentioned, use the cafeteria in the building and you should not linger in the public areas of the court house on this floor, in the lobby, or anywhere else. That is to ensure that you don't run into anyone relating to the case.

Fifth -- I think I am up to fifth -- do not do any research or any investigation about the case or about anyone who has anything to do with the case on your own. Don't go visit any place mentioned during the trial. And, as I said, don't read or listen to any news report about the case. Don't, as I have said, go on the Internet or use any digital device that you may have to learn about this case. Everything that you need to learn you will learn in this courtroom from the testimony of the witnesses or the exhibits that are entered into evidence. And again, your decision in this case must be made solely on the basis of the evidence presented at trial.

Once again, I expect you to inform me immediately

1

through my staff if you become aware of another juror's violation of these instructions.

Finally, each of you has been given a notebook and a That is because I do permit jurors to take notes. not have a pen or pencil? Raise your hand. Great. You do not have to take notes. Notes are just an aid to your own recollection. The court reporters in this case -- you have seen them taking down what everyone says during jury selection -- they will be here throughout the trial and record everything that is said in the courtroom, and any portion of the testimony can be provided to you during your deliberations. If you do take notes, please remember and be aware that note-taking may distract you from something important that is happening on the witness stand. Whether or not you take notes, rely on your own recollections and don't be influenced by the fact that another juror has taken notes. And if you do take notes, all notes must be left each day in the jury room. fact, any time you are leaving the courtroom, you are being excused to the jury room, you should take your notebook with you and it should remain with you at all times except overnight; leave it in the jury room, that room will be secured and -- that room will be secured.

From this point until the time when you retire to deliberate it is your duty not to discuss this case and not to remain in the presence of anyone else who may be discussing

this case. In that regard, I remind you that the parties and others involved in this case have been strictly instructed to have no contact with any of you, so if you happen to see any of them outside of this courtroom, again, they don't acknowledge you or hold the door for you or smile at you, don't take offense, they are simply following my instructions.

That concludes my preliminary instructions to you. What we are going to do, we are not going to proceed right now with the openings because we have to take care of a couple preliminary matters and I also recognize that today you didn't bring any lunch because you didn't know what our schedule was going to be. So, instead, while the schedule that I described will be the schedule going forward, today we are going to take a longer break so that you can go out of the court house and get food and then come back and be ready for the afternoon session. We will be ending today at 2:45, just so you know, and you can plan accordingly.

So, it is 11:49. I would like to start promptly — that means in this courtroom — at 1:00, so I am going to ask you to be back in the jury room — again, that's the courtroom on the eleventh floor that my clerk and Mr. Lee just brought you from so make sure you make note of where that is. I want you back in there by 10 minutes to 1:00 — so by 12:50. And I remind you that we cannot start until all 16 of you are there so, please, be back by 12:50. Don't wander in at 1:05 and

think that is harmless. It means everyone has to wait for you so be there by 12:50.

I think you received a placard from my law clerk. That should enable you to get through the security line more quickly. if you show that to the security at the front of the court house and tell them that you are sitting as a juror on a pending case, then they will usher you through the line more quickly. It is probably more important for the morning than afternoon but, in any event, it may be helpful.

So do not discuss the case, keep an open mind, you haven't heard the opening statements, you haven't heard any evidence whatsoever. Don't do any research about the case. Be in the jury room by 12:50, at the latest, ready to go.

These are going to be your seats for the duration of the trial so remember where you are sitting. You are now jurors no. 1 through 16 -- you have been re-numbered -- so remember where you are sitting. And if you can line up in that order, it will facilitate your entry into each row, as you just did.

With that, I wish you a pleasant break. We will see you promptly at 1:00 for opening statement.

Thank you.

(Continued on next page)

(Jury not present)

THE COURT: You may be seated. All right. I assume there is nothing further to discuss before the break?

MR. DENTON: Totally ministerial point, your Honor.

It looks like the podium in this courtroom actually has a decent amount of slack in the cables and it is on casters. If the Court and the marshals have no objection, it would be nice if we could position it a little more centrally, but we will do whatever the Court --

THE COURT: I will step down from the bench in a moment and Mr. Lee can assist you, and wherever it can go without messing things up is fine with me.

MR. DENTON: Thank you, your Honor.

THE COURT: Mr. Schulte, anything you need to raise?

MR. SCHULTE: Only wherever the government places the podium, that's where it should be for me as well.

THE COURT: Yes.

So you are going to stay in the courtroom for the next few minutes anyway so that you can test out the system and hopefully sort out anything on that end. I will ask the marshals to allow Mr. Schulte to remain up to 20 minutes, just so that he can hopefully figure all of that out, and in that time if you can all sort out where the podium should be, that would be great.

Please be back here no later than five minutes to 1:00

```

A F T E R N O O N S E S S I O N

2:00 p.m.

THE COURT: Is the government ready to proceed?

MR. DENTON: Yes, your Honor.

THE COURT: Mr. Schulte, are you ready to proceed?

MR. SCHULTE: Yes.

THE COURT: We will get the jury.

While we are getting the jury, two quick notes. One. My understanding from the CISO is that all the outstanding issues regarding the defense subpoenaed witness list have been resolved. My understanding is that one of the remaining two witnesses has agreed to be interviewed by the defense. So if that information hasn't been conveyed, the relevant arrangements haven't been made, you should talk to the CISO about that. My understanding is that the contact information for the last one that wall counsel was having trouble reaching has been provided directly to standby counsel in a departure from the usual arrangement. I think that resolves all of the outstanding issues on that front, but if not, you can let me know later.

Second, as promised, I did contact the MDC to see if they could accommodate Mr. Schulte's desire to have use of the printer in the mornings. I was told that that would likely be too difficult given how early he needs to be taken to court but that arrangements would be made for him to use the computer and

printer every evening at the end of the day. So Mr. Schulte, try to make due with that and plan ahead accordingly. If that is becoming a problem, let me know and I will revisit the issue, but I certainly do understand why, given the early mornings, it would be a complicated issue.

That's all I need to say and when the jury is here we will proceed. The government has its first witness ready to go?

MR. DENTON: Yes, your Honor. He is in the room just outside the courtroom.

THE COURT: All right. If the folks in the back could clear away from the doors? The jury will be entering in a moment.

THE DEPUTY CLERK: All rise.

(Continued on next page)

Opening - Mr. Denton

(Jury present)

THE COURT: You may be seated.

Welcome back, ladies and gentlemen. I hope you enjoyed your extended break. As promised earlier, we will begin now with the next phase of the case which is the opening statements of the parties, beginning with the government's opening statement by Mr. Denton, followed by Mr. Schulte. I remind you that what they say in their opening statements is not evidence. But, that being said, it is important, an important part of the process that helps you understand what they expect the evidence to show, and in that regard I would ask you to give both of them your undivided and close attention. With that, we will proceed.

Mr. Denton?

MR. DENTON: Thank you, your Honor.

Ladies and gentlemen: This man, Joshua Schulte, the defendant, is responsible for the single biggest theft of classified national defense information in the history of the Central Intelligence Agency, a leak that caused extraordinary damage to the national security of the United States and put the officers charged with protecting this country at risk. And when federal investigators confronted the defendant about it, he lied to them; lying to obstruct their investigation and hide the truth of his crimes.

On April 20th, 2016, the defendant, who was then

Opening - Mr. Denton

himself a CIA officer, stole a trove of sensitive national security files from a top secret CIA computer network in the covert office where he worked. Files revealing classified cyber tools, custom-built computer software that the CIA uses to track terrorists and collect intelligence from foreign adversaries for America's national defense. And on March 7, 2017, those classified files that the defendant stole were posted for the whole world to see on the website WikiLeaks.

The leak was instantly devastating. Critical intelligence gathering operations all over the world came to a crashing halt. CIA officers overseas were exposed. Allies wondered if intelligence they shared with America could also be leaked. Years of work and millions of dollars spent developing those tools went up in smoke.

The FBI sprang into action. Special agents collected enormous quantities of evidence and interviewed witnesses.

Entire CIA computer networks were seized as evidence and combed over by FBI experts in digital investigations. Their careful work revealed devastating proof of this man's crimes, proof that makes it crystal clear that it was the defendant who hacked that top secret network, stole an arsenal of cyber tools, and leaked it to WikiLeaks. Proof that the defendant's crimes were the ultimate act of betrayal because Joshua Schulte was one of the CIA's own. He worked for the very same part of the Agency that created the national security information that

Opening - Mr. Denton

he stole; building some of the very tools that he sent to WikiLeaks. Joshua Schulte violated his oath to protect the United States and safeguard those secrets and he violated the law.

Why did he do it? Why did Joshua Schulte violate his position of trust, betray his nation, damage national security? Why did he destroy the hard and sensitive work of colleagues and his own work as well? He did it out of spite. There is no misguided idealism here he did it because he was angry and disgruntled at work. He felt that the CIA had slighted him, had disrespected him, and so he tried to burn to the ground the very cyber intelligence work that he had once been a part of. He set out to wreck the CIA's intelligence capabilities for payback. But the defendant's vendetta didn't stop there. He continued it, even after the FBI arrested him. While in jail, Schulte got a smuggled cell phone, leaked classified information again, and plotted a campaign to disclose even more sensitive details about national defense.

The evidence in this trial will prove that the defendant committed crimes of espionage, stealing national defense information from the CIA. It will prove that he tried to commit more espionage by leaking more sensitive information from his jail cell. It will prove he committed crimes of computer hacking when he broke into parts of that top secret CIA network and then tried to cover his tracks by deleting

Opening - Mr. Denton

evidence of his crimes, and it will prove that when the FBI interviewed the defendant, he lied to them -- obstructing their investigation of this theft.

My name is David Denton. I'm an Assistant U.S.

Attorney here in the Southern District of New York and with my colleague, Mike Lockard, and paralegal Charlotte Cooper, we represent the United States in this case. Over the next few minutes I'm going to give you a preview of what the evidence will show during the course of this trial, evidence that you will see in the records or logs of the defendant's computer hacking, that you will read in his own words in things that he wrote from jail, and that you will hear from both the FBI agents who caught him and from the CIA officers who worked with him, evidence that will fit together to reveal the truth about each of his crimes.

So what will the evidence in this trial prove? You will learn that Joshua Schulte used to work as a software developer in an elite group at the CIA where programmers built sophisticated cyber tools to support national defense and intelligence operations against America's adversaries overseas. Schulte and his fellow CIA officers in that group worked in a secret building protected by armed guards accessed using special badges and codes. Inside that building the offices are literally vaults with security doors that have combination locks on them. Everyone who worked there had a top secret

Opening - Mr. Denton

security clearance vetted by CIA investigators to be sure they could be trusted with the precious secrets of America's national defense. From that secure CIA office, Schulte's group used a top secret computer network to develop the cyber tools the CIA used to collect intelligence on foreign enemies.

You will learn that in 2015, Schulte was given a special level of trust within the CIA. He was made a software administrator. He was put in charge of the programs that the CIA's developers used to do their work on that network. As you will hear on tape, he had super access, the kind of access that let him control all the sensitive intelligence projects on that network and even let him control who else had access to them.

One of the things you will learn that Schulte did as an administrator was to help make backups of that system.

Every day a complete copy of all of the CIA programmers' work was saved automatically in case of some catastrophe that required the system to be restored. It was one of those backups — backups he helped create — that Schulte stole and sent to WikiLeaks and you will see he did it for spite.

You will learn that in 2016 Schulte was having problems at work. He got into arguments and personal disputes with the other developers in his unit and you will learn that when one of those arguments got out of hand, Schulte decided to retaliate against another programmer by falsely accusing his co-worker of making a death threat against Schulte. Now, the

Opening - Mr. Denton

CIA investigated Schulte's allegation and determined it was baseless. That made Schulte mad. When the CIA decided to separate Schulte and that co-worker by reassigning both of them to different units within their group, he became even angrier — angry at his bosses, angry at the whole agency — angry because the CIA didn't take his side. So he started breaking the rules, critical rules that limit access to sensitive national security information. He secretly used that super access he had as an administrator to give himself control over sensitive projects he had expressly been told he was not allowed to control because Schulte didn't think those rules should apply to him.

Now, you won't be surprised to learn that when the CIA discovered that Schulte had tampered with that network, it raised all kinds of red flags. It was such a serious violation the CIA decided they had to immediately lock down the top secret network he had accessed. After the Agency found out what Schulte had done, CIA supervisors ordered people the next day to change the administrative passwords, take away the super access not just from Schulte but from any programmer. But, you will also learn that in locking down that network, there was one digital lock that the CIA didn't change, a lock that Schulte still had the key to, a key that meant he still had a way to manipulate their top secret network.

Four days after his administrative powers were taken

Opening - Mr. Denton

away, on April 20th, 2016, Schulte was told that other parts of that top secret system were also going to be changed, that the software that he used to administer was going to be moved on to a new computer. This was important news for him because that change would mean that that digital key to his secret access would no longer work. And so, the evidence will show that the same day he learned that news, Schulte stole the preciously-guarded national security information that WikiLeaks posted on the Internet.

On the evening of April 20th, Schulte used that key, the access he knew he wasn't supposed to have, to do something you will hear described as a reversion, kind of like restoring He used a backup copy of the system called a a phone. "snapshot" to take the system back to a particular point in time in the past. And the point he took it back to was before the system had been locked down, back to a time when Schulte had super access. The evidence will prove that on the evening of April 20th, from his desk in that secret CIA office, Schulte spent over an hour inside the CIA's top secret network, inside that snapshot from back in time before his administrative powers had been taken away -- administrative powers that Schulte believed no one had a right to take away from him. so, Schulte used the administrative powers that he had secretly restored to access those backups, the copies of the entire CIA cyber arsenal.

The evidence will show that shortly after he had broken back into the system, Schulte stole one of those backups, a complete copy, a particular one, the backup from March 3rd, 2016. That March 3rd backup is the source of the exact secrets posted online on WikiLeaks. And you will see that the last time anyone ever accessed that backup on the CIA's network was the evening of April 20th, 2016 at 5:43 p.m., 14 minutes after Schulte began his break-in.

You will learn that after stealing that backup, Schulte tried to cover his tracks. He started deleting log files, digital records that kept track of what he had done to the top secret network. He searched for and deleted dozens of log files. And then, after destroying that evidence, he unwound his reversion, meaning Schulte restored the system back to how it was just before he hacked in, digitally erasing that hour of time as if it never happened, wiping away the records of what he had done in that time. But Schulte's effort to hide the truth failed because there were log files he couldn't find and destroy that allowed the FBI to piece together a step by step digital record of his break-in.

In the days that followed April 20th, 2016, the evening that Schulte hacked into the system and stole that backup, you will learn that he started doing everything he needed to to send that stolen backup to WikiLeaks. downloaded programs on his home computer to let him hide his

Opening - Mr. Denton

identity on the Internet. He bought computer equipment to copy hard drives and transfer data without leaving a record on his computer so there would be no trace of that stolen backup. He researched how to verify if huge files, like the backups, had transferred successfully over the internet and how to destroy digital evidence at home just like he had destroyed digital evidence at the CIA. And you will see that when all was said and done two weeks after his digital break-in, after he had sent that stolen national defense information to WikiLeaks, Schulte tried to completely wipe his home computer clean of any remaining evidence. And you will learn that when Schulte took those precise steps on his home computer after April 20th, 2016, he was following the exact instructions on WikiLeaks for how to send stolen information without getting caught.

A few months later he resigned from the CIA and took a job here in New York and Schulte was here in New York on March 7, 2017, when WikiLeaks started posting the sensitive national security information he had stolen and sent to them. When the leak went public, the FBI immediately started to investigate. Agents interviewed hundreds of people, including Schulte. But Schulte lied to them, lied to obstruct the investigation by sending them down false paths. But the evidence will show that when that didn't work and Schulte was put in jail to stand trial, he doubled-down. He plotted to continue trying to hide evidence of his crimes and to disclose even more classified

Opening - Mr. Denton

information.

He got a cell phone in jail, a blatant violation of prison rules. He started writing to reporters. He sent one reporter a document containing classified information about a CIA network and the officers that used it. He used the secret phone to create accounts on social media to post things he had written containing even more sensitive information that would expose the tools used in CIA operations and the people who conducted them. And in notebooks he kept in jail, he wrote a detailed plan for what he would do. In his own words the defendant wrote: From here, I will stage my information war.

But before Schulte's campaign got into full swing the FBI caught him in the act. They searched the prison, they found his phone, they found his plan to destroy evidence and leak secrets and put a stop to it, preventing Schulte from leaking even more preciously-guarded intelligence.

Now, ladies and gentlemen, like I said, that's just an overview of what the evidence in this trial will prove. How are we going to prove it? The evidence is going to come in a lot of different forms. You will hear testimony from a number of different kinds of witnesses, like the agents and experts from the FBI who investigated Schulte's crimes, specialists in counter-intelligence, cyber crimes, digital forensics. They'll tell you about the investigation. You will learn from these witnesses how the FBI analyzed the classified information

Opening - Mr. Denton

posted on WikiLeaks and compared it to what was on that secret CIA network. And you will see how they determined that the stolen information that WikiLeaks published came from one spot, that specific March 3rd backup of the system, the very backup Schulte stole on April 20th, the backup that Schulte helped create and so he knew exactly how to steal.

Those forensic experts will also walk you through exactly what Schulte did when he stole those sensitive cyber intelligence tools. Even though he tried to delete any traces of his theft of classified information, this man's digital fingerprints were left behind. The FBI's experts found the trail of what Schulte had done in the computer memory of Schulte's own desktop computer at the CIA in spaces where data remained even after Schulte tried to erase them, data that will reveal how Schulte broke in and stole that backup.

Now, the details of the CIA's computers and the FBI's sophisticated forensic analysis that these witnesses will tell you about can be technical but the facts that evidence will prove are simple. On April 20th, 2016, the defendant gave himself access and control to a top secret system, stole the March 3rd backup of that system, tried to cover his tracks by deleting computer records, and then sent the information to WikiLeaks, all of which had devastating consequences for national security. Now, those witnesses will tell you what Schulte did, the conduct that makes him guilty of the crimes at

Opening - Mr. Denton

issue in this trial. But you will also hear from Schulte's co-workers at the CIA, covert officers responsible for developing the cyber tools that Schulte stole, who will help you understand why his crimes were so damaging and why he committed them. They will tell you about their group at the CIA and its important work for America's national defense, about that secret network they used to do their work. They'll talk about Schulte's arguments in the workplace, his spiral out of control, his quest for revenge. They'll tell you that Schulte got the nickname Nuclear Option because of his tendency to escalate and overreact when he felt aggrieved. And they'll tell you about the devastating consequences his actions -- his crimes -- had on their work in America's national defense because secret tools to gather intelligence only worked if the targets don't see them coming. And because of Joshua Schulte, those tools were all over the Internet.

You are also going to see a lot of exhibits in this trial, things like documents and physical evidence. For example, you will see e-mails and other records showing Schulte's mounting anger at the CIA and the things the agency did to try and address it. You will see Schulte's own statements, the lies he told to try to get what he wanted and to avoid punishment when he got caught. You will see the log files from Schulte's CIA computer showing him sending the digital commands on April 20th, 2016, to take that top secret

Opening - Mr. Denton

computer system back in time to restore his administrative powers, to delete evidence of what he had done, and to revert the system back to the present to make it seem like it never happened. You will see records about the March 3rd backup, proof that it was the source of those national security secrets posted on the Internet, proof showing the last time that backup was accessed was on the evening of April 20th, right in the middle of Schulte's digital break-in. You will watch the defendant talk on video about his administrative access to the CIA network. You will see him declare to a CIA investigator that he wanted his supervisors to be punished for the ways he thought they had disrespected him. You will see a video of Schulte when he was in jail using that secret cell phone and read the e-mails to a reporter attaching classified information.

You will see things that the defendant wrote in jail, like messages he planned to post on Twitter pretending to be someone else to spread false information to conceal his own guilt. You will see his plan for disclosing even more national defense information and drafts he wrote of what he planned to expose, draft Tweets he wrote to reveal secret information about CIA tools and operations conducted overseas, precious technical details about the ways the CIA collects intelligence from foreign adversaries, all written by this man as part of his plan for leaking to the world. You will read in his own

Opening - Mr. Denton

words his plan for waging his information war, things he wrote like: I will look to break up diplomatic relationships, close embassies. And this: Send all your government secrets here: WikiLeaks.

Now, as I said at the start, this is just a preview, this is just to give you some context for the evidence that you are going to see and hear over the next couple of weeks. At the end of the trial, after all of the witnesses have testified and you have seen all of those exhibits, Mr. Lockard and I will have another opportunity to talk to you about how the evidence proves the defendant's guilt. So, for now, I just want to ask you to do thee things during the course of this trial:

First, pay close attention to all the evidence. These can be long days, I know. Second, carefully follow Judge
Furman's instructions about the law. And finally, as he told
you before, just use your common sense. The same common sense
you use every day of your lives to make decisions. Apply that
common sense as you assess the evidence that you are going to
see and hear in this trial. If you do those three things, you
will reach the only conclusion supported by that evidence. As
I said before, some of that evidence is going to be complex,
but what the defendant did is not. Joshua Schulte hacked that
CIA network, stole that backup of cyber tools, sent it to
WikiLeaks, and then lied about it.

This man is guilty. Thank you.

THE COURT: Thank you, Mr. Denton.

We will now proceed with the defendant's opening statement and I would ask you to give the same undivided attention to him that you gave to Mr. Denton.

Mr. Schulte, you may proceed.

MR. SCHULTE: The evidence does not fit. There is no battle plan, there is no information war. The prosecution here simply has it wrong. I did not commit these crimes. At the end of the day, you will see that I'm not guilty.

Good afternoon, ladies and gentlemen. My name is Josh I am the defendant in this case. I was born on September 25th, 1988, in Lubbock, Texas, and today I am 33 years old. I discovered an aptitude for computers and technology at a young age and studied electrical and computer engineering at the University of Texas in Austin. After my first semester, I became an intern at IBM, but later opted to forego other internships in the previous sector for government work. I wanted to do something with my life, I wanted to serve my country since I was 12 years old. I was 12 years old on September 11th, 2001, and like many Americans, that vivid day is burned into my memory. I was in 7th grade at the time and saw the news while on the student council session. Ever since that fateful day, I wanted to serve my country, to make sure no such thing could ever happen again so I applied to the NSA and CIA immediately after completing my first semester of college.

13

14

15

16

17

18

19

20

21

22

23

24

25

After successful background checks and full-scope polygraphs, I was hired by both the NSA and CIA in 2010. I worked hard and specialized in counter terrorism. In fact, at the end of 2010, I assisted with many other engineers on a very special case to help verify the location of Osama Bin Laden. worked on many operations for the next six years until I resigned and moved to Manhattan to work for Bloomberg, LLP, in 2016.

Now, I have been called many things throughout my life but no one has ever questioned my loyalty and patriotism, that is until now.

On March 7, 2017, WikiLeaks released CIA information from the organization where I previously worked. The CIA was just as surprised as the rest of the world. They did not even realize their data had been stolen. It was incredibly embarrassing for the CIA. They did not know when their data was taken, they did not know how much of their data was taken, they did not know how their data was taken, and they certainly did not know who had taken their data. Nothing has changed today, they still don't know what happened. And the reason they could not identify the leak here, the computer network it was stolen from, called DevLAN, was so incredibly insecure, it was nicknamed the Wild, Wild West by the same programmers who worked on it. The trial evidence will show that DevLAN had no system to record how much data people transferred across the

Opening - Mr. Schulte

network, no access logs to record who accessed which files, no records at all to help track down who actually committed this crime. Everyone was empowered to do whatever they wanted. There were no restrictions. The trial evidence will show that multiple individuals told management that DevLAN was wildly insecure. An individual who worked at the NSA during Edward Snowden's leaks even went to management and told them the same thing could happen to DevLAN. But no one listened. No one paid attention to the warning signs. And so now, with no security, no logging, and every single DevLAN user an adept CIA hacker, it was impossible to find the leaker. But, of course, the CIA could not admit this. They could not issue a press release and say: Oops. Sorry, guys. We messed up. Our employees told us for years that the system was vulnerable but no one listened. Sorry, let's just move on.

The CIA had to save face. They faced tremendous political pressure to identify the leaker. They needed someone to blame, but they had no ideas and no leads. The evidence will show that the CIA and FBI immediately selected me as the patsy not because there was any evidence, clues or ability to identify the true leaker, but simply because of my previous irks with management and resignation from the CIA approximately six months before WikiLeaks released the CIA files.

The trial evidence will show that before the FBI even found a single shred of evidence, the CIA contacted the lead

Opening - Mr. Schulte

FBI agent and told him that I was the one they wanted prosecuted. The CIA directed the FBI to go after me with everything. This was a political witch hunt from day one. Instead of conducting any investigation whatsoever, the FBI simply worked backwards from me as their selected patsy.

There is no direct evidence linking me to the crimes they falsely accuse me of committing. Instead, the evidence will show that the government is able to seize large sets of data and from that data it can cherry-pick and manipulate the data to show virtually anything they want. If you missed a day of work because you were sick, they will say you were committing a crime that day. If you take your kid to the zoo, they will say you were scouting out a terrorist attack. If you sent a joke SnapChat to your friend with a bomb filter, they will say you were conspiring with others to boom the zoo.

That's the benefit when you are trying a circumstantial case. You don't seem to need any actual evidence. Why investigate and determine the truth when you can spin and manipulate everything to your benefit. That's what the government did here. Instead of looking through the evidence to find the culprit, they first singled me out as the guilty party, then worked backwards perverted, misinterpreted and manipulated the facts to present to you an alternate reality, an upside-down world, the government's twilight zone where they change the path as they see fit. And the theory

Opening - Mr. Schulte

they will present to you during this trial is not their first.

The FBI's first theory was that the data was stolen on March 7, 2016. The FBI reasoned that this was exactly one year before the WikiLeaks disclosure so it must be date of theft. The FBI also relied upon other circumstantial evidence claiming some suspicious or incriminating activity when, in reality, there were obvious innocent explanations for everything. The FBI were so certain of this theory of theft that they filed multiple search warrants swearing by these facts. But then the FBI discovered critical evidence proving their entire theory of prosecution was impossible. The FBI didn't miss a beat, though, inventing a whole new narrative and circumstantial evidence, and a whole new theory that I committed the crime on April 20th, 2016, stealing a March 3rd, 2016 backup from the CIA but, like the first theory, it is based entirely upon an alternate reality, one not based on the laws of this Universe.

The first aspects of the government's fantasy is motive. The government claims that I stole the CIA cyber tools and leaked them to WikiLeaks out of spite. This is a false claim. Certainly, by 2016, life had given me lemons on multiple occasions from small to big things, but each time I simply made lemonade and went on with my life. Never once did I react irrationally before, not in my entire career, yet the government's theory is that because my management removed me from actual responsibility that I was neither paid for nor

Opening - Mr. Schulte

cared to take, but literally tried multiple times to relinquish to others, that somehow I was driven to insanity, that I sacrificed my entire career and my entire life to leak unrelated materials to WikiLeaks.

The trial evidence will show that I stood up for I explained my position logically and argued my point. When I lost, I moved on. There was no lingering anger or hatred or malice, I moved on with my life. But that isn't the only absurdity to the government's spite motive. WikiLeaks? If someone intended to harm the CIA, they simply would have released the data on the Internet to expose everything. But that's not what happened here. Data was leaked to WikiLeaks, who then published a very small subset of the data. The Vault 7 source told WikiLeaks that he wanted to initiate a public debate about the security, creation, use, proliferation, and democratic control of cyber weapons. He was a leaker with a political agenda. This simply does not mesh at all with either the government's alleged spite motive or with my unquestioned patriotism and loyal personality. Nothing about the government's case makes any sense.

Working backwards, after they established the "why," then the "when" must be close by. The government establishes its false motive April 18th, and therefore the "when" is April 20th, 2016.

Now, the government is going to tell you that I broke

Opening - Mr. Schulte

the rules at the CIA and received a formal reprimand. The evidence will show that there were no rules on DevLAN. In reality, the evidence will show that I was the victim of an overly-ambitious co-worker who was displeased with my work on a project and who took advantage of his relationship with management to kick me off that project.

The government will also try to tell you that I somehow hid secret backdoor access to servers and lied to management about those back doors. The government will try to conflate different permissions, accesses, and servers all together to confuse you and pretend that the removal of one type of access included all accesses. In reality, the back door was the front door, and I even sent management e-mails of my project status and server accesses.

As to the events of April 20th, 2016, shortly after management formally reprimanded me, removed me from administrator accesses to servers I didn't want, and removed me from a project that I was still allowed to work on, the government says I used my backdoor access to take a different computer back in time to access and steal backups. But the evidence will show that this convoluted, confusing theory posed by the government was completely unnecessary because there were alternative direct ways to access the unsecure backups.

Additionally, the government will try to convince you that instead of copying the latest backup, the March 3, 2016

Opening - Mr. Schulte

backup was taken due to sentimental reasons. The evidence will show that just as the government's first theory that the March 7, 2016 backup must have been taken since it was exactly one year before the leak, the new March 3, 2016 theory is equally wholly speculative without a single shred of proof.

Most importantly, the computer I used at the CIA was preserved. Before I left the CIA I had every opportunity to completely wipe my CIA computer and all the data I worked on. In fact, it was actually common practice and many did do so. It was just like cleaning out your desk when you leave a regular job. A guilty person would have taken advantage of this practice and wiped the entire computer. I had no reason to and I did not do so.

Ironically, the evidence the government intends to present to this jury to convince you of my guilt in fact proves my innocence. The government has all the recorded logs from my CIA computer. You will hear that not a single log was deleted. In order for the government to show that I stole the March 3rd backup file, they must show two distinct commands; a command to log into the confluence virtual machine and then a command to copy the backup. And the government will prove to this jury, through its own expert witness, that neither command was executed. That should be it, right? The absence of any of these commands should prove my innocence. But not to the government. Their plan is to convict me regardless of my

Opening - Mr. Schulte

innocence.

Remember, this is the most embarrassing of situations for the CIA. They consider themselves on the cutting edge of technology and what happened to them? Someone stole their crown jewels and they failed to realize that for an entire year. It is not a good look for the CIA, so they will tell you that the reason these commands do not exist is because other log files were deleted. They will try to distract you with smoke and mirrors, they will try to distract you with what they claim is the deletion of log files from other computers, log files that were completely irrelevant to the missing commands from the logs of my own CIA computer.

Furthermore, these unrelated log files did not even log the activity the government alleges. So even if they existed today, they could not possibly show anything incriminating. But that's not all. The evidence will show that my CIA workstation also contained the log files of all drives I connected to it. During the time the government says I copied the backups — despite the absence of any copy command — I only connected one drive to my computer and I connected it into what is called a write blocker. This is a forensic device that prevents you from writing to the drive. So during the time the government claims I copied the backups, you will hear that there was not a single writable drive connected to my computer, nor did my computer even have the space to hold the backups.

Opening - Mr. Schulte

So how exactly was a CIA backup copied and to what? The government will never tell you. They do not even have a theory. That's reasonable doubt in and of itself. My CIA workstation proves my innocence.

The government's case is literally forensically impossible. In reality, the government's absurd fantasy about the theft of CIA national offense and tangible digital information on April 20th, 2016, is riddled with reasonable doubt.

Now we turn to my home computers. The government seized every computer and hard drive I owned from my apartment here in Manhattan. They also obtained all my records from Google and Amazon. Now, the government claims that these records will show that I downloaded programs and bought computer equipment to copy hard drives and transfer data without leaving a record on a computer. This is absurdly false. The trial evidence will show that I amass tech the way some amass shoes. I owned a massive server and regularly bought larger and larger drives to hold all of that data. In fact, I routinely bought all sorts of computer equipment from the Internet. The events after April 20th, 2016, are not unique in any way but represent a continuity of my habits and my hobbies.

The government claimed I transmitted the CIA backups that I never possessed from my home between midnight and 4:00 a.m. on May 1, 2016. This claim is not based upon forensics or

Opening - Mr. Schulte

evidence, but simply because the log showed I stayed up late this night. The trial evidence will show that I was recovering data from a failed hard drive and playing an online game that night. So what did the FBI find on my computers and servers from my Manhattan apartment? Absolutely nothing. No national defense information and certainly no backups. Indeed, once again, the government's own tech expert will prove my innocence. He is going to prove that the government's own theory of when and how I supposedly transmitted this massive amount of information is literally impossible. The trial evidence will absolutely prove my innocence.

You will notice the government tried to focus you on the March 3, 2016 backup file. You will see them wave this backup file in your face and construct a timeline analysis. However, there is absolutely no way to know which backup was actually stolen. The government's timing analysis only establishes that data up to March 3, 2016 was released by WikiLeaks. Every single backup file after March 3, 2016, contained all the data that was released by WikiLeaks; the March 4, 2016 backup, the April 4, 2016 backup. All the backups from March 3, 2016, until the actual leak on March 7, 2017, a full year of backups, contained the very data leaked by WikiLeaks. Thus, March 3rd is just the lower bound, the earliest date the data could have been taken, thus the range is March 3, 2016 to March 6, 2017.

Opening - Mr. Schulte

backup is completely meaningless, it holds absolutely no forensic significance and the government will present absolutely no evidence that the March 3rd backup was taken as opposed to any other backup after this date.

The government claims that the stolen CIA data was transmitted to WikiLeaks on May 1st, 2016, and that WikiLeaks sat on this information for an entire year before releasing it. Does that sound right to you? An organization that wants to spread information, give out the news, sits on information for a whole year? When you have an explosive story, think about the New York Times or the Wall Street Journal, they have a mind-blowing story. Do they sit on it for a whole year? It makes no sense. You do not sit on information to go stale for a year. You release the information you have. So the government's timeline does not make any sense.

But that's not all I stand accused of today. The evidence will show you that I am incarcerated. These fine gentlemen here are U.S. Marshals. You may see them throughout trial. Yes, after the government accused me of a crime I went to prison. Although I committed no crime, I am not even accused of any violence, I am still incarcerated. And I have been serving that prison sentence like any person who has been convicted for the past five years. If you have not experienced it yourself, you cannot possibly imagine how it felt not only to be arrested and charged as a traitor, but also to be

Opening - Mr. Schulte

presumed guilty and incarcerated. You cannot possibly know the pain and suffering of not only myself, but my family.

THE COURT: Mr. Schulte, I am going to interrupt you at this time and ask you to move on and do not address this, please.

MR. SCHULTE: OK.

And so the evidence will show I began to write a redress of grievances critical of the justice system. I was suffering from incredible strain and incredible stress and anxiety and firmly believed in the delusion that I simply needed to publish this redress of grievances that I entitled "The Presumption of Innocence," and American people would wake up, immediately chastise and correct this corrupt government, and then I could fairly fight my case from outside the confines of prison. I was, of course, mistaken.

My family and friends eventually published my unclassified redress of grievances on Facebook which you will read in its entirety. The government and the FBI, however, were enraged that a prisoner dare criticize them. So what did they do? They shut down the prison and with hundreds of FBI, BOP, and other agencies, searched the prison. They seized my notebooks labeled "attorney-client privilege" and they charged me with releasing national defense information from prison.

The first charge is for e-mailing a reporter about the illegal search warrants of my Manhattan apartment executed by

Opening - Mr. Schulte

the FBI. And this e-mail is a description of a network called Hickok. The government claims I purposefully wrote "Hickok" in this e-mail to disclose national defense information notwithstanding the true purpose of the e-mail to explain the corrupt FBI. The trial evidence will show you that the CIA labeled Hickok unclassified and even distributed the unclassified Hickok user's guide to its employees. Hence, I believed this information to be unclassified. After the government discovered the e-mail, the CIA decided to reclassify Hickok as top secret so it could charge me with an additional crime. You will see this evidence for yourself.

The second charge is thought crime. The government claims I thought about releasing national defense information from my prison cell. George Orwell's 1984 turned out to be a prophecy. The government claims that information I wrote in private notebooks labeled "attorney-client privilege" and only ever shared with my attorneys contained national defense information — information that had already been on the Internet for at least 18 months and reported by the New York Times and every major media outlet.

The prosecutor told you that I started an information war to leak national defense information from prison. These prosecutors are going to utter "information war" hundreds of times throughout this trial and this is the perfect example of how the government deliberately cherry-picks, manipulates, and

Opening - Mr. Schulte

perverts the truth to deceive you. You need only review the notebooks for yourself and see the obscure reference to an information war literally defined to be my unclassified redress of grievances criticizing this corrupt despicable justice system which I literally titled "The Presumption of Innocence." The irony appears lost on the government. It was not a war to release classified information but, instead, the term information war is used as it is colloquially known, a war for the hearts and minds. Indeed, you have likely heard that President Zelenskyy, of Ukraine, is similarly engaged in an information war for the hearts and minds to gain worldwide support for his country's war efforts against Russia.

The government, itself, is going to stipulate and agree that through my work developing malware and engaging in cyber operations against adversaries around the world, I learned substantial national defense information that would be extremely damaging if ever released, yet the thought crime allegations levied against me from the government are as far from this type of information as you can possibly get.

Furthermore, the evidence will definitively prove that I took no substantial step to ever disclose any of the unclassified information I wrote in my private notebooks labeled attorney-client privilege. My redress of grievances was the only thing I ever intended and ultimately did release publicly which the CIA and the government agrees was

unclassified.

Although the illusion that there is a presumption of innocence is indeed nothing but a facade, I ask the jury to grant me the status that our government has denied me. I ask that you realize how serious this trial is, how my very life is in your hands. I ask that you put yourselves in my shoes and treat me as you would like to be treated if you were here and I were there. I also ask that you keep an open mind throughout the entire trial and not make any decisions until deliberations at the end. Remember that the government will go first for everything. They went first here during the opening statements, they will call their witnesses first and get to question them first. And at the end they will not only go first in their summations but they will also go last. If you do all of this, I am convinced that you will reach the only possible verdict: That the government failed to prove beyond a reasonable doubt that I am guilty of any crime because I am in fact innocent. Then, perhaps, although five years denied, justice will be done.

Thank you.

THE COURT: Thank you, Mr. Schulte.

Ladies and gentlemen, a couple things. One is just a reminder that what Mr. Schulte said and what the government said, that what they said is not evidence. All right? You haven't heard any evidence yet. The evidence will come solely

from the witnesses who testify from the witness stand here and any exhibits that are admitted into evidence. So to the extent that the evidence comes in differently than either the government or Mr. Schulte has predicted, it is the evidence that you should consider and not their statements.

Second, at the appropriate time, I will give you instructions about what you may consider with respect -- how you may consider evidence concerning the fact that Mr. Schulte is incarcerated -- he told you that himself -- but at the appropriate time I will give you instructions on that. The bottom line is, as I stated before and that I state again, he is presumed innocent and the burden is on the government at all times to prove his guilt. With that, we will proceed with the first witness.

Mr. Denton, if you can call the first witness and as that witness comes in, perhaps adjust the podium, please?

MR. LOCKARD: Yes, your Honor. The government calls Richard Evanchec.

RICHARD JOHN EVANCHEC,

called as a witness by the Government,

having been duly sworn, testified as follows:

THE COURT: And if you, Mr. Evanchec, can take off your mask at this time?

THE WITNESS: Yes, your Honor.

THE COURT: Thank you.

2

10

11

Make sure you are an inch or two away from the
microphone, and speak loudly and clearly so everyone in the
courtroom can hear you.

THE WITNESS: Yes, your Honor.

THE COURT: Mr. Lockard, you may proceed.

MR. LOCKARD: Thank you, your Honor.

DIRECT EXAMINATION

BY MR. LOCKARD:

- Q. Good afternoon, sir.
- A. Good afternoon, Mr. Lockard.
- Q. Who is your employer?
- 12 | A. The Federal Bureau of Investigation.
- 13 | Q. What is your current position with the FBI?
- 14 A. I am currently a supervisory special agent in the FBI's
- 15 Dallas, Texas field office.
- 16 | Q. And what type of squad are you currently supervising?
- 17 A. I currently lead a squad that is comprised of 10 special
- 18 agents and 10 task force officers that are state, local, and
- 19 | federal law enforcement officers, and we handle all violent
- 20 crime and transnational organized crime in north Texas.
- 21 | Q. Prior to your responsibility of supervising that task
- 22 | force, what was your position?
- 23 A. Prior to this job I was the chief of staff for the FBI's
- 24 counter-terrorism division. Prior to that I was a supervisor
- 25 | in the FBI's counter-terrorism division. And just prior to

5

6

8

- that I was a special agent here in the New York field office. 1
- When you were in the New York field office, what type of 2 3 squad did you work on?
 - I was assigned to counter-intelligence Squad 6 here in New York, sir.
 - What type of cases did that squad investigate?
- 7 So that squad handled counter-intelligence investigations which is essentially the FBI's role in thwarting foreign
- 9 governments and their efforts to spy on American citizens,
- 10 American businesses of the United States government.
- 11 specific team of agents on CD-6 really focused on insiders,
- 12 that was the people that worked inside the U.S. government,
- 13 worked inside businesses and that were using their positions of
- 14 trust to provide information to foreign governments. So it was
- 15 really focused on the insiders, sir.
- In the course of your duties as a special agent on that 16
- 17 counter-intelligence squad, did you become familiar with an
- 18 investigation relating to Joshua Schulte?
- Yes, sir; I did. 19 Α.
- 20 What was your role in that investigation?
- 21 I was one of the lead case agents, sir. Α.
- 22 Could you explain what are the responsibilities of a case
- 23 agent?
- 24 In this investigation, because of the size of this
- 25 investigation, it was much of a coordination role, and that is

7

8

9

10

14

15

16

Evanchec - Direct

- making sure that the investigation was resourced, resourced by
 the appropriate personnel, that there was a clear investigative
 strategy, that there was communication amongst the various
 types of people that were there, but ultimately as a case agent
 in any FBI investigation the case agent is responsible for the
 - Q. Agent Evanchec, do you see Mr. Schulte in the courtroom today?
 - A. I do; yes, sir.
 - 0. Can you please point him out or describe where he is?
- 11 A. Yes. He is in the second table behind the U.S. Attorney's

 12 office, second seat, white mask -- hup, he stuck his head up

 13 right now and he just waved -- wearing a beard and shaved head.

THE COURT: Indicating the defendant.

overall conduct of that investigation.

- Q. Special Agent Evanchec, I would like to direct your attention to the date of March 7, 2017.
- 17 | A. Yes, sir.
- 18 | Q. Do you recall that date?
- 19 | A. I do.
- 20 | Q. Why do you recall that date?
- A. That was the date that WikiLeaks had released a treasure trove of classified CIA information that they called Vault 7.
- Q. In the course of your duties with the FBI, had you become familiar with the WikiLeaks organization?
- 25 A. I have; yes, sir.

- 1 | Q. Generally speaking, what is WikiLeaks?
- 2 A. It's an organization that attempts to obtain classified or
- 3 proprietary or sensitive information from governments around
- 4 | the world and from organizations. They then take that
- 5 | information and use their online presence, they use their
- 6 website, they use their social media to basically send that
- 7 | information throughout the world and they do so without regard
- 8 to the laws of those nations where that information is stolen.
- 9 Q. Prior to the Vault 7 release that you just described, had
- 10 | WikiLeaks previously claimed to have released classified
- 11 | information from the U.S. government?
- 12 | A. Yes, sir.
- 13 | Q. Had it previously claimed to have released information from
- 14 | foreign governments?
- 15 | A. Yes, sir.
- 16 | Q. Had it claimed to have released information from private
- 17 | individuals at organizations?
- 18 | A. Yes, sir.
- 19 | Q. From what sources does WikiLeaks claim to have obtained
- 20 | these kinds of information?
- 21 | A. From anonymous insiders, much like the people that I spoke
- 22 about earlier in my testimony, sir.
- 23 | Q. Turning back to the Vault 7 release that began on March 7
- 24 of 2017, can you describe what kind of information was included
- 25 | in that release?

Evanchec - Direct

- A. Yes. So this was classified information that was from a
 CIA network and on this network were tools, were computer
 programs that the CIA had developed in order to hack into the
 computer systems and digital media of enemies of the United
 States.
 - Q. And broadly speaking, when you say enemies of the United States, what types of targets are you talking about?

 A. Sure. The CIA's mission overseas really focuses on two priorities for them in categories of enemies. I think one, sir, would be a terrorist organization; they're actively working to exploit what terrorist organizations are doing, potentially plots that they're planning. The second major category would be hostile foreign governments, that is,

governments that are attempting to spy on the United States and

- the American people.

 Q. Are these computer programs that you described, are they
 - A. Yes, sir; they are.

sometimes called cyber tools?

- Q. How, if at all, did the development and the use of these foreign intelligence cyber tools relate to the United States' national defense?
 - A. These were tools, much like I mentioned before that the CIA was using overseas, to penetrate the computer systems of our enemies and I think that's important to our national defense because, as you can imagine, understanding what a terrorist

M6E5sch2

Evanchec - Direct

organization like Al Qaeda was doing, what they were planning, how they raised money, that would certainly be something the United States would want to know about so we could harden our defenses and disrupt those plots.

Similarly, when we talk about a foreign nation -- a hostile foreign nation, it would certainly be beneficial to know what countries were doing in attempt to steal, potentially, and for

example, you know, nuclear capabilities of our submarine or of our military, or our intentions with our military. So having

that type of information and being able to know it really would

permit our government to take proactive steps to protect our

12 country and the American people.

(Continued on next page)

4

Evanchec - Direct

1 BY MR. LOCKARD:

- Q. Were there additional releases following March 7, 2017?
- 3 A. Yes, sir, there were.
 - Q. Approximately how many releases altogether?
- A. I recall, sir, there being approximately 24 through the fall of 2017, if my memory serves me correctly.
- 7 Q. And what impact did the exposure of those CIA foreign
- 8 intelligence cyber tools have as a result of that release?
- 9 A. The impact, very specifically, was catastrophic --
- 10 catastrophic in the sense that CIA employees' operations
- 11 | overseas to stop a terrorist attack or thwart a spying effort
- 12 by a hostile foreign government were completely brought to a
- 13 halt. WikiLeaks had exposed these cyber tools that you
- 14 mentioned in such a way that our enemies now knew the
- 15 capabilities. They knew the types of weapons the CIA was
- 16 developing in order to thwart their plans. So operations
- 17 | overseas were, in many cases that I'm aware of, brought to a
- 18 complete halt.
- Back in the United States, in the CIA offices where these
- 20 | tools were being created, the innovation, the research that was
- 21 going in to develop new tools to provide new capabilities for
- 22 | the CIA was taken off-line completely. The system that they
- 23 used to create those tools was unplugged, for lack of a better
- 24 word. The individuals that had spent so much of their careers
- 25 developing these tools were sidelined from the day-to-day jobs

6

12

13

14

15

16

17

Evanchec - Direct

- as the FBI conducted an exhaustive investigation of what had happened.
- Q. What, if any, risks did the information in the Vault 7 releases create for individuals?
 - A. Any time you expose how a CIA officer conducts their business and it would have been the types of tools they were deploying you put the people that are responsible for using those tools at jeopardy. You essentially permit a hostile foreign government, to use that example, the ability to trace back if a tool was, you know, present on one of their systems or on one of their devices and to do basically an investigation of how that got there. So that essentially put our CIA officers overseas at risk of being identified, potentially arrested, and depending on where that CIA officer was
 - Q. Agent Evanchec, sitting next to you on the witness rail is a Redweld. Do you see that accordion folder?
- 18 | A. Yes, sir.
- 19 Q. Could you please take a look at the contents of that 20 folder?

stationed, certainly in personal harm's way.

- 21 | A. Yes, sir.
- 22 | Q. Have you seen that item before?
- 23 A. I have, yes, sir.
- 24 | Q. And do you recognize it?
- 25 A. I do.

M6eWsch3 Evanchec - Direct

```
1 | Q. What is that?
```

4

5

6

8

9

- 2 A. This is a HP laptop computer that contains a copy of the
- 3 downloaded Vault 7 release that was copied by the FBI in 2019.
 - MR. LOCKARD: The government offers that laptop as exhibit 1.
 - THE COURT: Is it marked as Government Exhibit 1?
- 7 THE WITNESS: Yes, sir, it is.
 - THE COURT: All right.
 - Any objection?
- 10 MR. SCHULTE: Yes. The defense objects.
- 11 THE COURT: All right. And just on the grounds that
- 12 | we've previously discussed?
- MR. SCHULTE: Yes.
- 14 THE COURT: Overruled. It's admitted.
- 15 (Government Exhibit 1 received in evidence)
- 16 BY MR. LOCKARD:
- 17 Q. Agent Evanchec, there should also be up there in the
- 18 witness box with you a black three-ring binder.
- 19 | A. Yes, sir.
- 20 Q. OK. Does that binder bear your initials?
- 21 A. Yes, sir, it does.
- 22 | Q. And did you review the contents of that binder before your
- 23 | testimony this afternoon?
- 24 A. Yes, Mr. Lockard.
- 25 | Q. And generally speaking, what are the contents of that

1 | binder?

- 2 A. These are essentially screenshots and files that WikiLeaks
- 3 | had released as part of their Vault 7 dissemination that
- 4 relates to many of the tools and products and discussion boards
- 5 that were housed on the CIA systems that I spoke about earlier
- 6 in my testimony.
- 7 Q. Does that consist essentially of a selection of some of
- 8 | those files from the Vault 7 release?
- 9 A. It does, yes, sir.
- 10 MR. LOCKARD: The government at this time offers the
- 11 | exhibits in the binder, which comprise -- I can list them
- 12 | off -- Government Exhibits 2; 3; 4, 4-1, and 4-2; 5, 5-1, and
- 13 || 5-2; 6, 6-1, and 6-2; 7, 7-1, 7-2, 7-3, 7-4, 7-5 and 7-6; 8,
- 14 \parallel 8-1, and 8-2; 9, 9-1, 9-2, 9-3; 10, 10-1; 11, 11-1, and 11-2;
- 15 | 12, 12-1, 12-2; 13, 14, 14-1; 15, and finally, 16.
- 16 | THE COURT: Any objections other than previously
- 17 | raised?
- 18 MR. SCHULTE: No.
- 19 THE COURT: Admitted.
- 20 | (Government Exhibits 2; 3; 4, 4-1 and 4-2; 5, 5-1 and
- 21 | 5-2 received in evidence)
- 22 | (Government Exhibits 6, 6-1 and 6-2; 7, 7-1, 7-2, 7-3,
- $23 \parallel 7-4$, 7-5 and 7-6 received in evidence)
- 24 | (Government Exhibits 8, 8-1 and 8-2; 9, 9-1, 9-2, 9-3;
- 25 | 10, 10-1 received in evidence)

- 1 (Government Exhibits 11, 11-1 and 11-2; 12, 12-1, 12-2; 13; 14, 14-1; 15, and 16 received in evidence)
 - MR. LOCKARD: Ms. Cooper, if you could please pull up

 Government Exhibit 2 and publish it.
 - Q. Agent Evanchec, do you recognize what's been admitted as Government Exhibit 2?
 - A. I do.

THE COURT: Hold on one second, Mr. Lockard.

Just to make sure our technology is working, can everybody give me a thumbs up if the monitor in front of them is working.

Excellent.

exposed in Vault 7.

You may proceed.

MR. LOCKARD: Thank you, your Honor.

- 15 | Q. Agent Evanchec, what is shown here in Government Exhibit 2?
 - A. This would have been one of the pages of the Vault 7 release. The formating is consistent with what I've observed in the CIA systems as part of my investigation. So this is, very generally, the CIA internal systems documents that were
- 21 | Q. And what did WikiLeaks subtitle the Vault 7 release?
- 22 | A. I'm sorry. I don't understand your --
- Q. Could you just read where it says Vault 7 and then what follows?
- 25 A. Oh. Yes, sir. "Vault 7 CIA hacking tools revealed."

- 1 MR. LOCKARD: Thank you.
- 2 Ms. Cooper, if you could please pull up Government
- 3 Exhibit 13 and publish it.
- 4 Q. And again, Agent Evanchec, do you recognize what's shown
- 5 here as Government Exhibit 13?
- 6 | A. I do, yes, sir.
- 7 Q. And generally speaking, what is this document?
- 8 A. This is a user guide that's classified as secret that is
- 9 the -- basically the overview of one of those cyber tools
- 10 called Brutal Kangaroo.
- MR. LOCKARD: Ms. Cooper, if you could please turn us
- 12 | to page 4 of the exhibit, which is page 1 of the user guide.
- 13 | Q. Drawing your attention to the third paragraph in section
- 14 | 1 -- third paragraph of the document, second paragraph in
- 15 | section 1.1, does this user guide contain a description of the
- 16 components of the Brutal Kangaroo project?
- 17 A. It does, sir.
- 18 | Q. And what is the component Drifting Deadline described as?
- 19 A. A thumb drive infection tool.
- 20 | Q. And what is the component described as Shattered Assurance;
- 21 | how is that described?
- 22 | A. A server tool that handles automated infection of thumb
- 23 drives in the primary mode of propagation for the Brutal
- 24 | Kangaroo suite. Shattered Assurance utilizes Drifting Deadline
- 25 | for the individual infection of thumb drives.

21

22

Evanchec - Direct

- 1 MR. LOCKARD: Thank you, Ms. Cooper. You can pull that down.
 - Q. What's your understanding generally what of that means, those descriptions?
 - A. It's essentially a thumb drive that was created by the CIA.

 It could be input into a computer network that would subsequently render other thumb drives that were later put in
 - Q. And looking at the designation in front of the description of the Brutal Kangaroo project, where it says (S) --
 - A. Yes.
- 12 | Q. -- what does that mean?

to be infected as well.

- 13 A. That indicates that paragraph is classified, and it's classified as secret.
 - THE COURT: Can I interrupt for one second. First of all, similarly, can you just explain what the marking on the top is that says secret/noforn.
 - THE WITNESS: Yes, your Honor.
 - This is a standard classification marking, your Honor, that the U.S. government uses. The first part of that, prior to the forward slashes, you see the word "secret," and that's the classification level.
- For the jury as well, oftentimes at the CIA I would
 see the word "secret" or even "top secret" where that word is.

 After the two slashes, you see the word "noforn," and that's

M6eWsch3

Evanchec - Direct

what we call a handling caveat. That essentially means that -it's further restrictions on the classification. So in this
case, noforn means not for foreign dissemination, so there's no
circumstance where this document would be able to be given to
any country even if it was an ally of the United States.

THE COURT: All right.

Let me interrupt, ladies and gentlemen, and say two things to you. First of all, certain documents that you'll see over the course of the trial contain these classification markings. Two things to tell you. One is certain documents, such as this one, have been declassified in connection with this case, in the litigation of this case, to permit the government and Mr. Schulte to use them and enter them into evidence and show them to you.

There may be some caveats to you that I'll describe to you at the appropriate time, but just so you understand, these are no longer classified, and that's why they're being publicly shown.

The second thing is, as I will instruct you at the close of the case and may give you further instruction during the case, ultimately, it is up to you, the jury, to find whether the government has proven beyond a reasonable doubt that the information, at least for certain of the counts, the information at issue qualifies as what is known as national defense information. All right?

Evanchec - Direct

In connection with that, you may consider the fact that the government considers and treated the information as classified, but classified information and national defense information are not necessarily the same thing. So that is a factor you may consider. I will give you further instructions about that at the appropriate time, but you may consider the markings on these documents as a reflection of how the government treated them, how the government viewed them, not for the truth of the fact that they were classified information, let alone national defense information. That is ultimately your decision to make, and I'll give you further instructions as appropriate.

Mr. Lockard.

MR. LOCKARD: Thank you, your Honor.

- Q. Agent Evanchec, you mentioned something called a handling requirement. What is the concept of handling requirements in the context of classified information?
- A. Essentially, sir, additional requirements that guide how that document can be handled. So something may be, for example, secret and sometimes you might see releasable to G.B., which would be Great Britain. So there are certain restrictions even within classifications that dictate how something can be properly handled.
- Q. Are there other handling requirements that come with the classification of documents?

9

- A. Yes, there are.
- 2 Q. And generally, what are those handling requirements?
- 3 A. Another example that you might see in this case, that I saw
- 4 | in my investigation, is AIOU. That would be agent internal --
- 5 excuse me, AIUO, agency internal use only, And oftentimes that
- 6 meant that that information was not allowed to be taken outside
- 7 of the CIA. So there would be any number of them. I just
- 8 | chose to give you that example because it was fresh in my mind.
 - MR. LOCKARD: Ms. Cooper, you can bring that down.
- 10 | Thank you.
- 11 | Q. And just focusing in on classification as something that is
- 12 either secret or top secret, does that come with handling
- 13 requirements?
- 14 A. Both would, yes, sir.
- 15 | Q. What types of handling requirements?
- 16 A. Again, you would have restrictions on dissemination to
- 17 | foreign governments. You'd have prohibitions on taking outside
- 18 of controlled CIA or U.S. government space. Those were
- 19 generally the handling caveats that you'd see, as your Honor
- 20 mentioned, on the top and bottom of the document.
- 21 | Q. And who is allowed access to information or documents that
- 22 | have been classified?
- 23 A. Only those individuals that have a active security
- 24 clearance and those who have a need to know; that is, they
- 25 | have -- because of their work assignment, they actually have a

4

5

6

7

- need to work on that specific product or read that exact document.
 - Just because you may possess a secret or top secret clearance doesn't mean you have a right to every top secret or secret document. I have to have an articulable need to know in order to gain access to documents and files that are
- 8 Q. Agent Evanchec, in the course of the investigation, did you
- 9 learn more specifically what CIA group's information had been
- 10 | included in the Vault 7 release?
- 11 | A. I had.

classified.

- 12 Q. And which group is that?
- 13 A. The Center for Cyber Intelligence.
- MR. LOCKARD: Ms. Cooper, could we please pull up
- 15 Government Exhibit 89 for Agent Evanchec.
- 16 | THE COURT: Just the witness only, please.
- 17 BY MR. LOCKARD:
- 18 | Q. Do you see what's been identified as Government Exhibit 89?
- 19 | A. I do, yes, sir.
- 20 | Q. And do you recognize it?
- 21 | A. I do.
- 22 | Q. And is that an accurate depiction of the subject matter
- 23 | that's being depicted there?
- 24 A. At the time of my investigation, it is.
- MR. LOCKARD: The government offers exhibit 89.

1	THE COURT: Any objection?
2	MR. SCHULTE: No objection.
3	THE COURT: Admitted.
4	(Government Exhibit 89 received in evidence)
5	MR. LOCKARD: Could we please publish?
6	THE COURT: You may.
7	Ladies and gentlemen, let me, just as we're starting
8	up, if you haven't picked up on this already, until something
9	is actually admitted into evidence, it's not in evidence, and
10	you may not consider it, which is why there will be moments and
11	times where things are displayed to the witness that you may
12	not see on your monitors. If either party wants to publish
13	something that is in evidence, admitted into evidence that
14	is, show it to you then they'll request to do so, and at
15	that time you'll be able to see it.
16	I should also mention that at the close of the case,
17	with certain limitations that I will explain when you begin
18	your deliberations, you will actually have all of the evidence
19	with you in the jury room. But while you should obviously take
20	the opportunity, when shown evidence, to look at it here in the
21	courtroom, you'll also have a chance to review it later.
22	BY MR. LOCKARD:
23	Q. Agent Evanchec, can you generally describe what's shown in
24	this chart?
25	A. Yes. This is an organization chart that basically outlines

7

- all of the offices and essentially the chain of command that

 Mr. Schulte would have been under as an employee of the

 operation support branch, which is where he was during the

 pertinent time of this investigation. You can see the

 different work groups and leadership that he would have been
 - Q. And just starting at the top, you mentioned that the stolen information in Vault 7 was from the Center for Cyber Intelligence?
- 10 A. That's correct, sir.

under at that time.

- Q. Broadly speaking, what was the mission of the Center for
- Cyber Intelligence at the time of your investigation?
 - A. Very broadly, this is the CIA's organization that handled all things, all things cyber. If there was a cyber need that the CIA had, it would come to this organization to handle.
 - Q. And moving one rung down on the org chart, what was the mission of the engineering and development group at the time of your investigation?
 - A. This, again, would have been -- excuse me.
 - This would have been a group of engineers that were collecting certain requirements needed from officers in the field, and they would be designing and creating tools that were needed to carry forward that mission.
 - Q. Was the engineering and development group responsible for using or deploying those tools?

- 1 A. They were not. That's a different group.
- 2 | Q. And then down underneath the Applied Engineering Division?
- 3 A. Another subset of that, that specifically targeted
- 4 | individual types of computer systems and individual types of
- 5 digital media. So again, these were engineers that were
- 6 | focused on developing those types of cyber tools, as you
- 7 mentioned before.
- 8 | Q. Are these the different branches that the engineers working
- 9 on the CIA's foreign intelligence cyber tools work in?
- 10 \blacksquare A. They are.
- 11 Q. Have you been to the offices of the CCI?
- 12 | A. I have.
- 13 Q. Is the location of those offices disclosed or undisclosed?
- 14 A. It is undisclosed.
- 15 | Q. How do you get into the CCI offices?
- 16 A. To get in, you would -- you would be in a vehicle; that's
- 17 | the only way to enter the facility. I think there's one
- 18 pedestrian entrance as well, but you approach a heavily
- 19 | fortified gate that has a barrier preventing vehicles from
- 20 coming in. It would be staffed by heavily armed police
- 21 | officers that are carrying military-grade rifles and pistols.
- 22 You would -- at that time of being stopped at the gate, you
- 23 | would be required to show a CIA-issued identification that
- 24 | would bear your photo, and then after confirming that your
- 25 photo looks like the person in the vehicle, the barrier would

Evanchec - Direct

lower. That vehicle would then be permitted to go inside a parking lot.

After parked, you would exit your vehicle. You would go through a heavily fortified entry door to the building. Just after making your way through that door, you would encounter a full-body turnstile that you would be required to present that same badge to a reader and then enter a unique identification PIN. At that time the full-body turnstile would permit you to enter the building, and that's how you would gain access.

- Q. And after gaining access to the building, where were the offices for the development branches in the Applied Engineering Division?
- A. IT'S MY understanding they were on the eighth and ninth floors.
 - Q. And what, if anything, would you do to then gain access to those offices?
- A. So, once again, each office -- it's actually called a vault in the CIA -- would have its own individual card reader again, and you would be required to present your identification badge to that card reader and then again enter that unique PIN that was issued to you in order to gain access to your work space.
- Q. Is anyone with a CIA badge allowed to enter those particular vaults?
- 24 A. No, sir.
 - Q. Who was permitted to enter?

Evanchec - Direct

- A. Only the individuals who were assigned to or had a need to access that work space were granted access to that space. So you may have worked on the fifth floor of the CCI building, but that did not mean that you had access to other offices throughout, and you would have had to have an established need to know and approval, and that approval had to have been granted by the security branch within the office to be given access to that vault.
- Q. What, if any, other additional security measures were there for those individual office vaults?
- A. So, during the hours that the vault was not occupied by employees, it was secured by an alarm system and by an additional door-locking mechanism. And essentially, if you were the last person at night to leave your vault, you would be required to arm an alarm system that was motion activated so that if someone was able to gain entrance to that vault at night, in an unauthorized manner, an alarm would go off that would signal to the police force there at the building, and they would respond.

Additionally, as the last person to leave, you would engage an additional spin dial-type of safe lock that would be an additional type of security feature that would prevent you from going in.

And that door, I should mention, is a fortified steel door.

Q. You talked earlier a little bit about security clearances?

M6eWsch3

- 1 | A. Yes.
- 2 Q. Were the personnel at the CCI offices, did they have
- 3 security clearances?
- 4 A. They did.
- 5 Q. Generally speaking, what security clearance would employees
- 6 | there have?
- 7 A. Top secret.
- 8 | Q. Now, were the CIA cyber tools, those foreign intelligence
- 9 computer programs, were they written on any particular computer
- 10 | system within the CCI?
- 11 A. They were.
- 12 | Q. And did that system have a name?
- 13 | A. It did.
- 14 Q. What was it called?
- 15 A. DevLAN.
- 16 | Q. Do you know what DevLAN stands for?
- 17 | A. I believe it was development local area network.
- 18 | Q. From where could the DevLAN computer network be accessed?
- 19 A. Only within CIA spaces.
- 20 | Q. Turning back again to the initial release of Vault 7 on
- 21 | March 7, 2017, when did the FBI begin investigating the Vault 7
- 22 | release?
- 23 | A. Immediately after the release on March 7 of 2017.
- 24 | Q. And what was that nature of the investigation that opened
- 25 on March 7?

2

3

4

5

6

7

8

9

10

11

12

15

16

20

21

22

23

24

25

- A. The initial investigation actually opened via Washington field office was what the FBI calls an unsub investigation, and that is essentially the FBI was aware that a massive crime had been committed but did not yet know who the perpetrator of that was. So we open what we called an unknown subject investigation in order to find out who the perpetrator was.

 So the initial investigation opened on the 7th was an unsub investigation sponsored by our Washington D.C. field office.

 Q. When did you personally become involved in the investigation related to the Vault 7 release?
- A. The following day, on the 8th of March.
- Q. And what was the nature of your investigation?
- 13 A. It was specifically a full field investigation on Joshua
 14 Schulte.
 - THE COURT: Mr. Lockard, if we're done with this exhibit, can we take it down?
- MR. LOCKARD: Oh, yes, we can.
- Q. Now, between the two investigations, approximately how many

 FBI personnel were involved?
 - A. From both offices, I would say over the course of this investigation, over a hundred.
 - Q. What were the first steps taken in those investigations?
 - A. The very first steps that were taken were essentially a fact-finding effort, you know, where was this information, where were these computer systems within the CIA, who had

M6eWsch3

Evanchec - Direct

access to this computer system? And those questions were asked so that the next step could be taken, which would be to begin to collect and preserve evidence that could speak to who committed this crime.

So after the fact-finding mission of finding where the system was and who had access to it, our Washington field office very methodically, one by one, took control of every piece of digital media that was part of or that could have ever touched the DevLAN system.

- Q. And approximately how many pieces of computer equipment did the FBI seize as part of securing the DevLAN network?
- A. Sir, it was hundreds and hundreds of pieces. You know, when I left the investigation, I understood that there were upwards of 1.4 petabytes of data that had been collected from those offices.
- Q. So, you hear a lot about megabytes and gigabytes and terabytes, what is a petabyte?
- A. A petabyte is an extraordinarily large volume of data. My understanding is one petabyte of data would basically be the equivalent of over 220,000 movies, or DVDs. And we had 1.4 petabytes, so an extraordinarily large volume of data.

I've also heard petabyte described as over 500 billion pieces of paper. So we're talking about an extraordinary amount of evidence, a nearly unprecedented in the FBI's investigative history amount of data, classified data that was

1 recovered.

- Q. What did the FBI then do with that seized data and computer equipment?
- A. That -- those computers, those servers, those hard drives, those thumb drives were all cataloged by serial number, and they were taken into a sequestered space that the FBI controlled in order to maintain the integrity of that evidence.
 - Q. And after securing and cataloging the evidence, what did the FBI then do?
 - A. That data was then loaded on to new servers, additional servers, so that it could be reviewable. There was such a huge volume of evidence that we had to assemble a massive team to go through very meticulously and review it. So they were uploaded on to a new system that would thereby allow dozens of computer scientists or analysts or special agents to simultaneously review that information and, even more importantly, would allow us to write computer programs to go and search against that data to find anomalies or to find suspicious things that happened in there.

So the short answer was uplifting that into a new system and new servers in order to allow for a multipronged, multifaceted review of that evidence.

- Q. Now, when did Mr. Schulte's employment at the CIA come to an end?
 - A. On November 10 of 2017.

4

25

- 1 | Q. Did the FBI seize computers --
 - A. Excuse me. I'm sorry.
- 3 November 10, 2016.
 - Q. Thank you.
 - Did the FBI seize the computers that Mr. Schulte had used when he was with the CIA?
 - A. We did.
 - MR. LOCKARD: At this time the government would offer a stipulation.
- 10 | THE COURT: Is it marked as an exhibit?
- 11 MR. LOCKARD: It is marked as Government Exhibit 3005.
- 12 THE COURT: You may proceed.
 - Ladies and gentlemen, I mentioned earlier a stipulation is just a fancy lawyer term for an agreement; that is to say, it's an agreement between the government in this case and Mr. Schulte. You may consider the stipulation as you would any other evidence. What weight, if any, you choose to give to it is up to you, as with any evidence.
 - With that, Mr. Lockard, you may proceed.
- MR. LOCKARD: Thank you, your Honor.
 - I think, particularly for the benefit of the court reporter, if we could please display 3005?
- THE COURT: You may.
 - MR. LOCKARD: "It is hereby stipulated and agreed by and among the United States of America, by Damian Williams,

M6eWsch3

United States Attorney for the Southern District of New York, David W. Denton Jr. and Michael D. Lockard, Assistant United States Attorneys, of counsel, and Joshua Adam Schulte, the defendant, that:

If called as a witness, a member of the Federal Bureau of Investigation ('FBI')'s computer analysis response team ('CART member-1') with knowledge of the matter would testify that on or about March 10, 2017, CART member-1 was present at the office building for the Central Intelligence Agency ('CIA'), Center for Cyber Intelligence ('CCI'), located in the Washington Metropolitan area (the 'CCI building'). While CART member 1= was present in room 9E79 of the CCI building, CART member-1 recovered (i) a Dell Precision computer tower that was used by the defendant to access the CIA computer network called DevLAN while the defendant was employed at the CIA and that was logged into evidence as E0001 RM9E79 tower ('device E0001') and (ii) a SanDisk Extreme USB device that was logged into evidence as E0003_RM9E79_FM104 ('device E0003 FM014'). Device E0001 contained four hard drives ('hard drive-1' through 'hard drive-4'). Government Exhibit 1201 is a compact disc containing true and accurate copies of photographs of device E0001; Government Exhibit 1202 is a compact disc containing true and accurate copies of forensic files and data recovered from hard drive-1; Government Exhibit 1203 is a CD containing true and accurate copies of forensic files and data

recovered from hard drive-3; Government Exhibit 1203-28 is a CD containing a true and accurate copy of a log file recovered from hard drive-3; Government Exhibit 1204 is a compact disc containing true and accurate copies of photographs of device E0003_FM014; and Government Exhibit 1205 is a compact disc containing true and accurate copies of forensic files and data recovered from device E000_FM014.

- "2. If called as a witness, another member of FBI CART ('CART member-2') with knowledge of the matter would testify that on or about March 11, 2017, while CART member-2 was present in room 9E79 of the CCI building, CART member-2 recovered a NetApp server containing 24 hard drives that was logged into evidence as E0018_RM9E79_24HDD ('device E0018'). Government Exhibit 1206 is a compact disc containing true and accurate copies of photographs of device E0018, and Government Exhibit 1207 is a compact disc containing true and accurate copies of forensic files and data recovered from device E0018.
- "3. If called as a witness, another member of FBI CART ('CART member-3') with knowledge of the matter would testify that on or about March 23, 2017, while CART member-3 was present in room 9W89A of the CCI building, CART member-3 recovered an ESXi server that was logged into evidence as E022_RM9W89A_Dell ('device E0022'). Government Exhibit 1208 is a compact disc containing true and accurate copies of photographs of device E0022, and Government Exhibit 1209 is a

compact disc containing true and accurate copies of forensic files and data recovered from device E0022.

"4. If called as a witness, another member of FBI
CART ('CART member-4') with knowledge of the matter would
testify that on or about June 9, 2017, while CART member-4 was
present in room 9E78 of the CCI building, CART member-4
recovered a Dell Precision tower 7910 containing two hard
drives that was logged into evidence as E0056-RM9E78-010
('device E0056'). Government Exhibit 1210 is a compact disc
containing true and accurate copies of photographs of device
E0056, and Government Exhibit 1211 is a compact disc containing
true and accurate copies of forensic files and data recovered
from device E0056.

"5. If called as a witness, another member of FBI
CART ('CART member-5') with knowledge of the matter would
testify that on or about March 12, 2017, while CART member-5
was present at an offsite CIA facility located in the
Washington Metropolitan area, CART member-5 recovered a NetApp
server that was logged into evidence as E0012_RMLE70E ('device
E0012'). Government Exhibit 1212 is a compact disc containing
true and accurate copies of forensic files and data recovered
from device E0012.

"It is further stipulated and agreed that this stipulation, as Government Exhibit 3005, Government Exhibits 1201 through 1212, and all government exhibits contained on

4

5

6

7

8

9

10

11

Evanchec - Direct

- Government Exhibits 1201 through 1212 may be received in evidence as government exhibits at trial."
 - The government offers exhibit 3005 and all of the identified exhibits therein.

THE COURT: Admitted pursuant to stipulation.

(Government Exhibits 1201 through 1212 and 3005 received in evidence)

THE COURT: Go ahead.

BY MR. LOCKARD:

- Q. Agent Evanchec, before we were talking about the seizure of computer evidence and data from the CCI offices; you were
- 12 | talking about how Vault 7 included classified information from
- 13 | the DevLAN computer network. In the course of the
- 14 | investigation, was the FBI able to determine specifically what
- 15 | computer files had been taken?
- 16 A. We were.
- 17 | Q. And specifically, what computer files had been taken?
- 18 A. Application called Confluence.
- 19 Q. And were particular files containing the Confluence data
- 20 | identified?
- 21 | A. Yes.
- 22 | Q. Which files were those?
- 23 A. They were files from a backup copy of the system.
- Q. And what was the date of the backup that contained the data
- 25 | that was released in the Vault 7 release?

- 1 A. March 3, 2016.
- 2 | Q. And in the course of the investigation, was the FBI able to
- 3 determine on what date those March 3 backups were stolen?
- 4 A. We were.
- 5 Q. And generally speaking, what type of investigative
- 6 | technique led to that conclusion?
- 7 A. Very broadly, it was a very exhaustive forensic analysis of
- 8 | the treasure trove of digital media that I spoke about earlier
- 9 | in my testimony.
- 10 | Q. And what part of the FBI team performed that analysis?
- 11 A. Our computer scientists.
- 12 | Q. And did they determine who had stolen the March 3, 2016,
- 13 | backups on April 20?
- 14 A. They had.
- MR. SCHULTE: Objection. Hearsay.
- 16 THE COURT: Sustained.
- MR. LOCKARD: Ms. Cooper, could you please pull up
- 18 Government Exhibit 1207-27, which is in evidence. And publish.
- 19 Q. Special Agent Evanchec, do you recognize what's shown here
- 20 as Government Exhibit 1207-27?
- 21 | A. I do, yes, sir.
- 22 | Q. And what is shown here?
- 23 | A. This is a file directory from the Altabackup, which is the
- 24 | backup I talked about before, of the Confluence application.
- 25 | Q. And how often was the Confluence system backed up?

1 $\|$ A. Daily.

7

- 2 MR. LOCKARD: And if we could focus in on, I think,
- 3 about seven or eight from the bottom, the March 3, 2016,
- 4 backup. Actually, before we go in --
- 5 Q. So there's a column here for the name of the file. Are
- 6 there also columns with date information for the files?
 - A. Yes, sir, there are.
- 8 | Q. And what's the first date column?
- 9 A. It is the date modified.
- 10 | O. And then the second date column?
- 11 A. The date accessed.
- 12 | Q. And the third date column?
- 13 A. The date created.
- MR. LOCKARD: OK. Thank you, Ms. Cooper. If you
- 15 | could zoom in on March 3.
- 16 Q. So what is the date modified and date created date for the
- 17 | March 3?
- 18 A. March 3, 2016.
- 19 \parallel Q. What is the date accessed date for the March 3 backup?
- 20 | A. April 20 of 2016.
- 21 | Q. And what is the time stamp on that access date?
- 22 | A. 5:42 p.m.
- 23 MR. LOCKARD: We have another stipulation that we
- 24 | would read at this time, Government Exhibit 3004.
- 25 | THE COURT: You may proceed.

(Government Exhibits 3004 and 5001 received in evidence)

THE COURT: Ladies and gentlemen, sorry for stealing three minutes of your time. I told you we'd end at 2:45, but I didn't want to interrupt the stipulation, so it's now 2:48. I thank you for that. We'll stop there for the day. Tomorrow I'm sure you'll learn more about some of those exhibits. We'll pick up where we left off.

Let me note one thing. In one of those paragraphs, there was a reference to various, I think, CIA employees by first name only. As you'll see, given sensitivities involved and some of the people who worked for or work for the CIA, with my permission -- or actually, at my direction -- the parties are going to refer to certain people just by their first names and in certain limited circumstances by actually other names altogether. But we'll give you further instructions on that; I just wanted to explain that and that it is with my approval.

A few important instructions for the end of the day.

No. 1, don't discuss the case with each other, with anyone you live with, or anyone you work with -- anyone -- in any way, shape or form. Don't do any research about the case or anyone involved with it. You need to keep an open mind.

You've heard the parties' opening statements, and you've heard the very beginning of the evidence, but there's plenty more to come and it's critical that you keep an open

Evanchec - Direct

1 mind.

I mentioned this yesterday, but if you happen to develop COVID-19 symptoms, let alone test positive for COVID-19 overnight, please contact us. Call us. I know that we gave you our contact information, so you should let us know, and we'll give you further instructions, but we obviously want to keep everybody safe and healthy throughout the trial, and that's an important part of it.

As I told you, we'll start tomorrow promptly, I hope, at or just after 9:00. To enable us to do so, please be in the jury room where you went to earlier on the 11th floor by no later than 8:45. If all goes according to plan, there will be coffee and breakfast items waiting for you there. And just a reminder that we cannot start until all 16 of you are here. So out of respect for one another, if not for us, please be there by 8:45 so that we can start promptly and make the best of your time.

Also, a reminder, tomorrow we will start our sort of standard schedule, which involves just the one short break during the middle of the day, usually about 30 or 40 minutes, tops, so you may want to bring a snack to tide you over until the end of the day. We'll stop at 2:45 tomorrow as well.

With that, one last reminder, just because these are the first days, remember to keep your juror placard, and when you arrive in the morning, when there may well be more people

Evanchec - Direct

coming into the courthouse, just have it handy. Make sure you show it and identify yourself to the security officer as a sitting juror, and they will hopefully escort you through the process a little more quickly. With that, all those very important instructions, I wish you a very pleasant evening, and we will see you tomorrow morning. You're excused at this time. (Continued on next page)

```
1
               (Jury not present)
 2
               THE COURT: You may be seated.
 3
               Members of the public, if you could just wait a moment
 4
      to let the jury clear the floor, I would appreciate it.
 5
               All right.
6
               Sir, you may step down from the witness stand.
 7
               THE WITNESS: Thank you.
               THE COURT: Please be here a few minutes before nine
8
9
      tomorrow so that we're ready to go promptly when the jury is
10
      here.
            I will see you tomorrow.
11
               (Witness not present)
12
               THE COURT: All right.
13
               Mr. Denton or Mr. Lockard, can you give me a preview,
14
      tomorrow, how many witnesses or what witnesses you might be
15
      calling?
16
               MR. LOCKARD: So, we expect that Agent Evanchec will
17
      take up most of tomorrow, depending on cross. If he concludes,
      then Anthony Leonis will follow him.
18
               THE COURT: OK. And remind me when, or tell me, based
19
20
      on where we are when you would expect the witness who might
21
      testify this week who would be subject to the security
22
     protocols would be testifying.
23
               MR. LOCKARD: Possibly tomorrow.
24
               THE COURT: Is that Anthony Leonis?
25
               MR. LOCKARD: Yes, sir.
```

THE COURT: OK. Thank you for clarifying that.

All right. Anything else that the government needs to raise?

MR. DENTON: Yes, your Honor.

One kind of ongoing issue. We still have not heard anything from the defense about reductions in the list of subpoenaed witnesses. We're now at the point where we probably do need to start making travel arrangements for people to get up here even from the D.C. area, and it seems rather pointless to spend the effort to do that for 40-plus people, given both the representations from the defense on Friday that they were planning to cut that list down and the Court's at least very strong suggestion that the defendant's proffer was not sufficient as to a significant number of them. So I don't know quite what to say other than that we've made our motion, and if we don't hear something from the defense soon, I think we're just going to ask the Court to start ruling there.

THE COURT: All right.

Mr. Schulte, what's the status on that?

MR. SCHULTE: Yes. We did cut the list significantly, but I haven't been to the SCIF in a while. So whenever -- today, after this is over, when we go -- we can have the list ready and give it to the government.

THE COURT: Great. Per the arrangements I made with the marshal, my understanding is you'll be brought to the SCIF

after trial each day.

Marshal's giving me the thumbs up, so I assume that you will indeed be there. Make sure you get that list to the government, and if there are any issues, we can begin discussing them and begin working through them tomorrow.

I did want to make one observation or comment, Mr. Schulte.

I interrupted you only once during your opening when I thought you crossed the line in terms of commenting on the conditions of confinement and the impropriety of your confinement. But more broadly, I was a little concerned. tried to make clear in the final pretrial conference the importance of adhering to and respecting the line between when you testify, if you choose to testify, which is evidence, and everything else that you say. And I think that much of what you did, particularly at the beginning of the opening, when you basically introduced yourself to the jury and gave a biography and talked about joining the government after 9/11, if you testify, it may well be that some of that comes into evidence, but it was not presented in that way. It was not couched with a "I expect the evidence to show." It was really presented as a first-person testimonial, and in that sense it really did cross the line.

The government did not object. I chose not to interrupt. I chose to give a cautionary instruction at the

close of your opening, evenhanded, addressed to both the government's opening and your own. But I just want to underscore that going forward, in your questioning to the witnesses, in your closing arguments, you must adhere to that line. You must respect it. If you don't, I will have no choice but to cut you off and make clear to the jury that the only evidence presented by you is if you take the stand and testify under oath subject to cross-examination. Anything else that you say you're saying in your capacity as a lawyer, and you'd better understand that distinction and ask questions in a way that doesn't potentially cause confusion.

All right?

MR. SCHULTE: Yes. I understand. I think I expect some of the, several of the documents to come in with that information from the beginning, so it's not necessarily testimonial, but that was my anticipation.

THE COURT: Again, it may well be that the evidence does support those statements, but it wasn't presented in that manner. It was presented as a sort of firsthand testimonial, and I thought I had made clear at the final pretrial conference that you should be careful and not do anything of that sort.

In any event, I'll leave it there, and hopefully that is sufficient.

I need to leave in a moment. Give me one second, though.

All right. As I said, I have a hard stop today at three. I need to leave. It doesn't sound like there's anything else from you. I am told that one of the jurors wishes to speak to me. I don't know what that pertains to.

I'll try and find out some more information, and we can take it up in the morning if need be. Hopefully, it's not anything significant.

With that, we are adjourned for the day. Please be here a few minutes before nine so that if there's anything for us to take up before we begin with the jury we can do so promptly. I expect to have the witness in the witness box no later than 9:15, ideally even before that.

Have a good evening, and I will see you tomorrow morning.

(Adjourned to June 15, 2022, at 9:00 a.m.)
